

IN THE UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF PENNSYLVANIA

ACCU-SPEC ELECTRONIC
SERVICES, INC.,
Plaintiff

v. CIVIL ACTION NO. 03-394 ERIE

CENTRAL TRANSPORT
INTERNATIONAL, INC. and
LOGISTICS PLUS, INC.,
Defendants

JURY TRIAL - DAY NO. 2

Proceedings held before the HONORABLE

SEAN J. McLAUGHLIN, U.S. District Judge,

in Courtroom C, U.S. Courthouse, Erie,

Pennsylvania, on Tuesday, October 18, 2005.

APPEARANCES:

W. PATRICK DELANEY, Esquire, appearing on behalf
of the Plaintiff.

JEFFREY D. COHEN, Esquire, appearing on behalf

W. JOHN KNOX, Esquire, appearing on behalf of
Defendant Logistics Plus, Inc.

Ronald J. Bench, RMR - Official Court Reporter

3 (Whereupon, the Jury Trial proceedings began at

4 9:05 a.m., on Tuesday, October 18, 2005, in Courtroom C.)

5

6 THE COURT: Good morning, ladies and gentlemen.

7 All right, would the witness resume the stand, please.

8 I think we were up to you, Mr. Knox.

9 MR. KNOX: Thank you, judge.

10 ERNEST CARLSON, PLAINTIFF'S WITNESS, PREVIOUSLY SWORN

11 CROSS-EXAMINATION

12 BY MR. KNOX:

13 Q. Good morning, Mr. Carlson.

14 A. Good morning.

15 Q. You are president of Accu-Spec, correct?

16 A. Yes.

17 Q. Can you hear me better now?

18 A. Yes.

19 Q. Mr. Carlson, are you aware of any written documentation

20 sent by Accu-Spec to Logistics Plus that specifically told them

21 that this was an X-ray machine that needed to be shipped?

22 A. No, I'm not.

23 Q. Similarly, are you aware of any written documentation

24 that was sent by Accu-Spec to Logistics Plus that tells them

25 that this was a fragile piece of freight?

5

1 A. No, I am not.

2 Q. Lastly, are you aware of any written documentation that

3 was sent by Accu-Spec to Logistics Plus that specifically tells

4 them that this was a \$120,000 piece of freight?

5 A. No, I'm not.

6 Q. Mr. Carlson, yesterday I believe you said that this

7 freight was not a typical shipment for Accu-Spec, am I

8 characterizing your testimony more or less correctly?

9 A. That's correct.

10 Q. Is it fair to say that this was one of the more valuable

11 shipments that Accu-Spec was going to be shipping back in 2002,

12 2003?

13 A. It is one of the most valuable shipments that we would

14 receive.

15 Q. And, again, this is a \$120,000 shipment, correct?

16 A. Yes.

17 Q. Mr. Carlson, I guess what I'm struggling with, what my

18 client is struggling with, if this equipment is so atypical, so
19 valuable, somewhat important to your company, why wouldn't you
20 send any written documentation to Logistics Plus telling them
21 exactly what this shipment was?
22 A. I believe and, once again, I had asked my program
23 manager, Jim Mullen, to arrange for the shipment. And,
24 although, we've called it equipment, we called it an X-ray
25 machine, we did not call it anything but that.

6

1 Q. I know you called it that --
2 THE COURT: Hang on a second, you've got to let him
3 finish. You've got to keep your voice up. Pretend you're in
4 the warehouse yelling at a guy across the way. Do it that way.
5 THE WITNESS: All right. Exactly how Jim expressed
6 this to Logistics, I do not know. I know that he had phone
7 conversations with him. And should have been described as the
8 equipment, or the X-ray machine, whatever, we had nothing to
9 hide. It would be silly to presume that we went and bought an
10 above average machine, we could have got a \$60,000 machine and
11 been in business, but we went for the very best. We arranged

12 to have to a rigger there to pick the machine off. It does not
13 make sense to try and save a few hundred dollars on freight.

14 BY MR. KNOX:

15 Q. Mr. Carlson, yesterday I believe you also said that after
16 you issued your letter of February 21, 2003, marked as
17 Plaintiff's Exhibit 20, if I may show you -- may I approach?

18 THE COURT: Sure, you don't have to ask permission.

19 THE WITNESS: Okay.

20 BY MR. KNOX:

21 Q. That's the letter I'm talking about?

22 A. Yes.

23 Q. Correct me if I'm wrong, I believe your testimony as to

24 yesterday was after the issuance of that letter, that you

25 didn't get any response from anybody, was that your testimony?

1 A. That's correct.

2 Q. But isn't it true that in fact after that letter was

3 issued, Mr. Fanzini, Chris Fanzini of Logistics Plus, was in

4 constant communication with Mr. Mullen seeking to address this

5 issue?

6 A. I did say that there was some verbal communication, but
7 nothing of any value or consequence.

8 Q. Are you aware of any e-mails that were in fact sent back
9 and forth between Mr. Fanzini and Mr. Mullen?

10 A. There could have been, but right now, no.

11 Q. Accu-Spec submitted a formal claim, it looks like, on
12 April 4, 2003, I'm going to put that up on the screen -- do you
13 see that document, sir?

14 A. Yes, I do.

15 Q. Would you agree that that claim is against Central
16 Transport and Central Transport only?

17 A. Yes, it is.

18 Q. Is Logistics Plus even mentioned anywhere on that
19 document?

20 A. No, it is not.

21 Q. Similarly, on May 22, 2003, it appears that your attorney
22 sent a letter right after the formal claim to Central Transport
23 basically reiterating that you wanted Central Transport to pay
24 the claim, is that correct?

25 A. I cannot read this document.

1 Q. I'll show it to you.

2 MR. COHEN: Your Honor, with respect to this
3 document, it contains hearsay, we object to its admittance.

4 THE COURT: I can't read the document, either, so I
5 don't know if it contains hearsay or not, let me see it. Well,
6 as an initial matter, it's important for me -- are you even
7 moving this document, because if you're not moving the
8 document, it obviates, it moots your objection, doesn't it?

9 MR. KNOX: I am going to move it.

10 THE COURT: Let me see you at side bar.

11 (At side bar on the record.)

12 THE COURT: Let me read it. All right. Let's do it
13 this way, what is the relevance of this?

14 MR. KNOX: We are trying to establish that,
15 basically, Accu-Spec is making a claim against Central
16 Transport --

17 THE COURT: You can establish that without the
18 content of the letter. You have a hearsay objection?

19 MR. COHEN: It's hearsay, also a consequential set
20 of damages that shouldn't be presented. As well as the

21 settlement issues.

22 THE COURT: You can reference the letter, who it's
23 addressed to, if it's not addressed to anybody else. And then
24 you can argue whatever inference you want to the jury from
25 that.

9

1 (End of discussion at side bar.)

2 THE COURT: Take that off the screen.

3 MR. KNOX: Yes, your Honor.

4 BY MR. KNOX:

5 Q. Mr. Carlson, what I'll ask you is, were you aware that
6 your attorney sent a letter to Central Transport, after you
7 made a formal claim to Central Transport, that your attorney
8 sent a letter on May 22, 2003, to Central Transport basically
9 demanding payment?

10 A. Yes.

11 Q. Was a similar letter sent to my client, Logistics Plus,
12 around that time demanding payment?

13 A. I do not know that.

14 Q. Mr. Carlson, did Accu-Spec eventually send a letter to

15 Central Transport demanding full payment several months later

16 in November of 2003?

17 A. We may have, I cannot recall right now.

18 Q. Isn't it true that you basically tried to have this claim

19 resolved with Central Transport first, and then tried to

20 resolve it with Logistics Plus after Central Transport denied

21 your claim?

22 A. We asked Central Transport because they were the firm

23 that actually had delivered the equipment to our facility. And

24 we also included Logistics because they were the people that we

25 hired to get the freight to our facility.

10

1 Q. And you've acknowledged that you did receive a denial

2 letter from Mr. Cackowski from Central Transport saying we're

3 denying your claim because we have a signed delivery receipt

4 and for a number of other reasons?

5 A. Yes.

6 Q. In that letter from Central Transport, did they give you

7 any idea as to why you might want to bring a claim against

8 Logistics Plus?

9 A. No.

10 Q. Did Central Transport at any time give you an idea as to
11 why you think Logistics Plus should be involved?

12 A. Central did not, no.

13 Q. Mr. Carlson, this shipment was delivered February 14,
14 2003, correct?

15 A. Yes.

16 Q. Had you dealt extensively with Logistics Plus prior to
17 this shipment?

18 A. Me personally, no.

19 Q. Had Accu-Spec shipped other pieces of freight with
20 Logistics Plus prior to this shipment?

21 A. I think we did have some transactions, but I could not
22 tell you what they were.

23 Q. Do you know if Accu-Spec in fact used Logistics Plus to
24 negotiate prices on other shipments after this freight was
25 delivered and discovered to be damaged?

1 A. I know that we've had business dealings, yes.

2 Q. In fact, isn't it true that Accu-Spec has used Logistics

3 Plus even after it sued Logistics Plus in this case?

4 A. I know that we had the machine transported back to

5 England and back into the states again through Logistics.

6 Q. I'm not talking about that machine, I'm talking about any

7 other shipments unrelated to this case?

8 A. I believe that there probably are, yes.

9 Q. Mr. Carlson, would you agree that Mr. Fanzini, on behalf

10 of Logistics Plus, responded the same day when you reported

11 that there was an issue with this freight?

12 A. Yes. Could I elaborate on that?

13 Q. That's fine.

14 A. Okay.

15 Q. Mr. Carlson, I want to put another document up here.

16 That's one of the pictures of my copies of exhibits, it's not

17 as clear, but I believe that's a picture that's been

18 referenced; have you seen that picture before?

19 A. Yes.

20 Q. Specifically, I believe it's referenced as Plaintiff's

21 Exhibit 9. Mr. Carlson, do you see any symbols on this crate?

22 A. Yes, I do.

23 Q. What symbols do you see?

24 A. The umbrella and the glass.

25 Q. What is your understanding of what the glass or wine

12

1 glass symbol means?

2 A. Fragile.

3 Q. Do you have any experience in learning about the symbols

4 on crates?

5 A. Some, yes.

6 Q. How did you know that that wine glass means fragile?

7 A. From some past receipt, even on small boxes that is on

8 there.

9 Q. I'm almost done here, Mr. Carlson. In looking at some of

10 those pictures yesterday in response to questions from your

11 attorney, it looked like there was a computer screen on the

12 outside of the X-ray machine, would you agree with that?

13 A. I believe there was, yes.

14 Q. Isn't it true there's some glass components, including

15 that computer screen, that are part of this X-ray machine?

16 A. I would imagine there is some glass, yes.

17 Q. Lastly, Mr. Carlson, I believe yesterday you said

18 something that with regard to this shipment, that price was not

19 an issue; do you remember saying something like that?

20 A. Right.

21 Q. Were you aware that Mr. Mullen, your employee who was

22 negotiating with Logistics Plus here, was trying to get a good

23 price on this shipment?

24 A. All I know is that he did make arrangements for the

25 shipment and the amount we paid.

13

1 Q. Did you at anytime instruct him to get the best deal

2 possible?

3 A. No, all of our employees naturally ask for the best deal

4 possible, just as we did on the X-ray machine. But we do not

5 do anything that's going to harm ourselves or, you know, do

6 anything that would do any harm to the equipment that we're

7 trying to get into our facility.

8 Q. Mr. Carlson, have you reviewed any of the deposition

9 transcripts in this case in preparing for your testimony here

10 today?

11 A. No.

12 Q. You haven't reviewed any of them?

13 A. All I know is through the documentation that we had at
14 our facility.

15 Q. Are you aware, in any form whatsoever, that Mr. Cackowski
16 has indicated that the Class 50 rate was essentially the
17 cheapest rate at which to ship?

18 A. I learned of class rates after the damage was incurred.
19 I had no idea what class rates even were prior to that.

20 MR. KNOX: Thank you, that's all I have.

21 THE COURT: Any redirect?

22 MR. DELANEY: Just a few, your Honor.

23 REDIRECT EXAMINATION

24 BY MR. DELANEY:

25 Q. Mr. Carlson, that's Exhibit 9 on the screen, that's the

14

1 picture that Mr. Knox just showed you?

2 A. Yes.

3 Q. What does the umbrella refer to?

4 A. Do not get wet.

5 Q. To your knowledge, is this something, these symbols

6 something that are commonly used in shipping?

7 A. Yes.

8 Q. Even in the small type of shipping boxes that you use?

9 A. Yes.

10 Q. You explained to me, actually this morning, that you have
11 some background in packaging, don't you?

12 A. Well, I do have an interest in a packaging company.

13 Q. Tell me what you mean by a packaging company?

14 A. We have a facility that's got about six or seven
15 full-time employees that package materials for a particular
16 customer. And involves putting things in boxes and crates and
17 so forth.

18 Q. Have you ever gone down there and actually worked
19 yourself?

20 A. I have when we've been in a big pinch, I've gone down at
21 the end of the year.

22 Q. Does that company ever ship, has it ever shipped anything
23 as large as this X-ray machine, two-and-a-half tons?

24 A. No, probably a ton-and-a-half.

25 Q. All right. And would the ton-and-a-half piece -- was it

1 equipment, by the way?

2 A. No -- well, it would be equipment and sheet metal.

3 Q. And are you familiar with how that was packed?

4 A. Yes.

5 Q. Or crated?

6 A. Yes.

7 Q. With that knowledge and the fact that you looked at the

8 crating with regard to this machine when it arrived on February

9 14th, do you have any opinions about the appropriateness or the

10 effectiveness of the crating of this particular machine?

11 MR. COHEN: Your Honor, objection.

12 THE COURT: Let me see you over at side bar.

13 Members of the jury, we've had a few side bars, let me just

14 tell you what they are. Remember I told you that you are the

15 finders of fact. We're discussing legal issues over there

16 which don't involve you, we try to keep those to a minimum, but

17 they are kind of a necessary evil.

18 (At side bar on the record.)

19 THE COURT: Okay.

20 MR. COHEN: It has not been established sufficient

21 to give an opinion with respect to how good or bad the

22 packaging was. It's potentially prejudicial testimony, and he

23 has no personal knowledge and foundation.

24 MR. DELANEY: It falls under 701 with regard to lay

25 testimony. He's familiar with the packaging of a large piece

16

1 of equipment.

2 THE COURT: Let me just read it to refresh my

3 recollection. I'm going to overrule the objection, under 701

4 there is a sufficient foundation laid. I'm going to overrule

5 the objection.

6 (End of discussion at side bar.)

7 BY MR. DELANEY:

8 Q. Mr. Carlson, based upon your experience in having seen

9 that package or that crate on February 14th, do you have an

10 opinion about the appropriateness or the effectiveness of that

11 particular crating of that equipment?

12 A. We did not see anything to question the crate, it did

13 look fine. Especially since the equipment actually went

14 through the bottom of the crate.

15 Q. In your opinion, did this machine somehow shift or wiggle

16 inside the crate?

17 A. No, no way.

18 Q. Did you reach some conclusion about how the damage to the

19 crate and the equipment must have occurred?

20 MR. COHEN: Objection, your Honor.

21 THE COURT: Overruled. When you make an objection,

22 I presume it's a foundational objection, I don't want to put

23 words in your mouth?

24 MR. COHEN: It goes to the conclusion as to how the

25 damage, foundational and knowledge, yes, your Honor.

17

1 THE COURT: It's overruled. This goes for

2 everybody, in the future when you make an objection, it's not

3 enough to make an objection, you have to state the basis for it

4 because I can't guess. Go ahead.

5 BY MR. DELANEY:

6 Q. My question was did you reach a conclusion about how the

7 damage to this crate and the damage to the equipment had

8 occurred?

9 A. Yes, the crate was dropped.

10 Q. Okay. I noticed that when Mr. Knox was questioning you,
11 you were asked a question about whether Mr. Fanzini from
12 Logistics Plus had had some conversations after the claim had
13 been made, and you wanted to say more and Mr. Knox I guess
14 didn't want you to say more. Do you recall what you wanted to
15 say?

16 A. Yes. I wanted to say we did have communications with
17 Chris, he was helpful to the point that everything was
18 Central's fault.

19 MR. DELANEY: Thank you.

20 THE COURT: Anything further?

21 MR. COHEN: If I may, just some brief recross with
22 respect to this witness. Thank you, your Honor.

23 RECROSS-EXAMINATION

24 BY MR. COHEN:

25 Q. Mr. Carlson, you've testified that you have some

18

1 familiarity with packaging, correct?

2 A. Some, yes.

3 Q. You've not worked in the shipping department, you're the

4 CEO of the company, correct?

5 A. I'm the president.

6 Q. You're the president?

7 A. Yes.

8 Q. On a daily basis do you package freight?

9 A. Not everyday, no.

10 Q. Right. If there's somebody sick, you have to fill in,

11 you go take care of what has to be taken care of in any

12 department within the company, is that fair to say?

13 A. Yes, it is.

14 Q. With respect to shipments that generally are shipped from

15 Accu-Spec, my understanding is you go through UPS, is that

16 correct?

17 A. Yes.

18 Q. You usually have small shipments, correct?

19 A. Yes.

20 Q. Maybe bubble wrap, those peanut kind of foam --

21 A. Peanut foam and packaging, yes.

22 Q. As far as your experience in shipping a one-and-a-half

23 ton piece of equipment, I mean is this a regular occurrence?

24 A. For the other business, yes, it is.

25 Q. How many times have you personally packaged a

1 ton-and-a-half piece of equipment?

2 A. Myself, probably been involved once or twice.

3 Q. Okay. So would it be fair to say you have very limited

4 experience, exposure to packaging heavy equipment?

5 A. If you want to say that, okay.

6 Q. Sir, are you familiar with a document called the National

7 Motor Freight Classification?

8 A. No.

9 Q. Okay. Are you familiar with or do you know or have you

10 discussed with anybody the contents since this litigation has

11 started of the National Motor Freight Classification?

12 A. Not to my knowledge.

13 Q. I'm going to show you a page from the National Motor

14 Freight Classification -- your Honor, it's on the overhead and

15 ask the witness some questions about it, if that's okay.

16 THE COURT: All right.

17 BY MR. COHEN:

18 Q. First, I'm going to show the face of the book, this is

19 the National Motor Freight Classification, and this one happens

20 to be from 2004. It's about two-inches thick and I'm turning
21 to page, it's three-inches thick, I'm turning to page 200. And
22 it is the section which specifically deals with packaging for
23 crates. If you believe it, there is a specific requirement for
24 packaging crates, nothing left to chance. My question is, Mr.
25 Carlson, can you read this -- can you see this?

20

1 A. If it stops moving. Yes, I could see it.

2 Q. This indicates that crates or containers --

3 THE COURT: That's too fast, my court reporter is
4 having a hard time.

5 MR. COHEN: I'm going to slow down, thank you, your
6 Honor.

7 BY MR. COHEN:

8 Q. "Crates or containers constructed of members made of
9 song wood or structural panels or metal with anchors between or
10 members made of song wood or structural panels or metals
11 combined with fiberboard." It goes on to describe specifically
12 how a crate should be put together. Then there's a subheading
13 wooden crates. "Other than wire bound crates, crates must be

14 constructed as follows. The lumber must be seasoned,
15 reasonably sound and free from cross grain and knots, which
16 would interfere with nailing or stapling or knots which are
17 greater than one-third of the width of the lumber." Did you
18 inspect the wood to determine if it qualified pursuant to this
19 instruction as far as wooden crates?

20 A. No.

21 Q. Number two, "crates must be constructed with outer
22 framework consisting of uprights and horizontal members and
23 with additional diagonal upright and horizontal members where
24 necessary to provide proper strength and rigidity." Did you
25 inspect to see that this structural integrity was provided in

21

1 the crate?

2 A. I would say that the crate demonstrated those features.

3 Although, I'm unaware of this document.

4 Q. Let's take a look for a second at the crate. This is the
5 crate, Exhibit 9. It says crates must be constructed out of --

6 THE COURT: Say that one more time.

7 MR. COHEN: I'm going to slow down.

8 THE COURT: You are going to slow down.

9 MR. COHEN: It's very difficult. Thank you.

10 BY MR. COHEN:

11 Q. "Crates must be constructed with outer framework

12 consisting of upright and horizontal members and with

13 additional diagonal upright and horizontal members where

14 necessary to provide proper strength and rigidity." In the

15 picture do you see any vertical members?

16 A. Yes.

17 Q. Do you see any diagonal members?

18 A. No.

19 Q. The next one, number three, I'll just read it rather than

20 have it up on the screen. "Crates must be constructed with

21 three-way locking corners, where members will be joined with

22 nails or staples driven into side grain of adjoining members."

23 Did you inspect this crate to see if that was complied with?

24 A. No.

25 Q. Four, "all adjoining crate members must be fastened by

1 double nailing or stapling." Did you inspect the crate to see

2 if that was complied with?

3 A. No.

4 Q. "Crates must be designed and constructed with transverse

5 cross members at base of sufficient strength to protect the

6 underside article from damage by mechanical handling

7 equipment." Did you specifically inspect the crate to

8 determine if that characteristic was met?

9 A. We did see that, yes.

10 Q. The next one is structural paneling, including plywood or

11 strand board and wafer board, must be manufactured with

12 exterior glue. Were you able to figure that one out from the

13 crate?

14 A. No.

15 Q. Is it fair to say you do not know if this crate meets

16 these specifications?

17 A. You could be correct.

18 MR. COHEN: Thank you, Mr. Carlson.

19 THE COURT: Anything further of this witness?

20 MR. KNOX: No, your Honor.

21 THE COURT: All right, sir, you're excused.

22 MR. DELANEY: Your Honor, we're going to call Mr.

23 Mullen to the stand.

24 THE COURT: All right. Mr. Mullen, come on up here,
25 stand in front of my deputy clerk and she's going to administer

23

1 the oath to you.

2 THE CLERK: Raise your right hand.

3 JAMES MULLEN, PLAINTIFF'S WITNESS, SWORN

4 DIRECT EXAMINATION

5 BY MR. DELANEY:

6 Q. Mr. Mullen, could you tell us your full name, your
7 business address and your current occupation?

8 A. My name is James M. Mullen, my occupation is I'm a sales
9 rep for a company called Marsh Electronics, and I work out of
10 my house, that's my office and my address is 3716 Main Street
11 here in Erie.

12 Q. Let's talk about your work history. I understand at one
13 point in time you worked for Accu-Spec, is that correct?

14 A. Yes, I worked for Accu-Spec Electronics from 2001 until
15 2004.

16 Q. And prior to working for Accu-Spec, where were you?

17 A. I spent 22 years in the Navy, and then I worked for a
18 company called Advocom, which was a small distributor out in
19 McKean. And then I worked for a couple other distributors
20 because the companies I worked for were bought by bigger
21 companies, which kind of eliminated the competition.

22 Q. I'm sorry, what date did you leave Accu-Spec?

23 A. I left there in February of 2004.

24 Q. All right. Did your leaving Accu-Spec have anything to
25 do with the events that we're talking about in this lawsuit?

24

1 A. No, sir, this was just an opportunity for me to do
2 something different.

3 Q. Thank you. Back in 2003, what was your position or what
4 were your duties at Accu-Spec?

5 A. I was the program manager there, and I had several
6 duties. I had shipping, receiving was a responsibility.
7 Training, facilities maintenance, different things like that.

8 Q. Do you recall in either late 2002 or early 2003 being
9 told that Accu-Spec was going to buy and receive a piece of new
10 equipment, an X-ray machine?

11 A. Yes, there was a discussion about that.

12 Q. And what involvement did you have with either the
13 purchase or the acquisition or the receipt of that piece of
14 equipment?

15 A. I really had no involvement in the purchasing of it, that
16 was Ernie and the operations manager's area that they were
17 working on. I was only called on to have it shipped.

18 Q. Do you remember who spoke with you about that?

19 A. Ernie did.

20 Q. Did Mr. Carlson give you any instructions about how it
21 should be shipped or with what company you should have it
22 shipped or any details like that?

23 A. No, he didn't. He left that up to me.

24 Q. Did you receive any instructions from Mr. Carlson or
25 anyone else to try to negotiate some low rate for shipping?

25

1 A. No, I didn't.

2 Q. By rate I mean price?

3 A. No.

4 Q. What did you do, Mr. Mullen, what did you do when you

5 received this assignment?

6 A. When I got all the information from Ernie, I contacted

7 Chris Fanzini of Logistics Plus --

8 THE COURT: Slow down a little bit, sir, you're

9 speeding up too much. Go ahead.

10 THE WITNESS: I contacted Chris Fanzini and I told

11 him that I had some equipment that needed to be moved from

12 California to our facility in McKean. And I gave him all the

13 dimensions and the weight, and that's how I left it. I asked

14 him to just get me a quote.

15 BY MR. DELANEY:

16 Q. Okay. And Mr. Fanzini was an employee of Logistics?

17 A. Yes.

18 Q. Had you dealt with Logistics before this transaction?

19 A. Yes, we had been.

20 Q. Tell us about that, what did you know about Logistics or

21 how had you dealt with them?

22 A. Logistics Plus, typically when we had a move, we had a

23 customer in Sharpsville that we would consolidate shipments for

24 once a month. So we would put it on a skid and we would have

25 Logistics Plus move those for us through a trucking company.

1 Q. Okay. And was it always Mr. Fanzini that you worked
2 with?

3 A. No, after the initial transaction was set up to move this
4 freight for us on a regular basis, I would simply call the
5 facility and talk to whoever answered the phone and tell them
6 that we had a shipment that was ready to go to Sharpsville.
7 And they would send a truck out to pick it up.

8 Q. Mr. Fanzini is related to you, is he not?

9 A. Yes, sir, he's my son-in-law.

10 Q. Does he still work for Logistics, if you know?

11 A. No.

12 Q. And he was your son-in-law back in 2003, I presume?

13 A. Yes, he was.

14 Q. Was it customary or unusual for Accu-Spec to be arranging
15 a shipment of a piece of equipment as large as this X-ray
16 machine?

17 A. Yes, it was. Because that wasn't what we typically dealt
18 with.

19 Q. Was it customary or was it infrequent, that was the
20 question?

21 A. It was infrequent.

22 Q. Now, you speak to Mr. Fanzini, you ask him to take a look

23 at arrangements for the shipment of this particular piece of

24 equipment, is that right?

25 A. Yes, sir.

27

1 Q. All right. I'm going to show you a document that is

2 Defendant's Exhibit CT-5 -- I want to show it to you first and

3 see if you are familiar with it?

4 A. Yes, I am.

5 Q. Tell us what that document is?

6 A. That's an e-mail from myself to Chris Fanzani, giving him

7 more detailed instructions on what we needed, we needed

8 equipment picked up from Dage Precision in California. I gave

9 him the contact's name out there, the phone number, the

10 dimensions and the weight of the equipment. And that's what I

11 sent to him.

12 MR. DELANEY: Your Honor, I'd move for the admission

13 of Defendant's CT-5.

14 THE COURT: It's admitted.

15 BY MR. DELANEY:

16 Q. Let me show this to you. Jim, is this off your e-mail,

17 would this be a hard copy of your e-mail?

18 A. Yes, it is.

19 Q. In it do you describe this as a crate or as equipment?

20 A. I describe it as equipment.

21 Q. What is, just for the record, what's the name of the

22 company from whom the equipment will be picked up?

23 A. The name is Dage Precision Industries, Inc.

24 Q. All right. And then you give the phone number of Dage, I

25 presume?

28

1 A. Yes.

2 Q. And Bonnie Nichols is who?

3 A. She was our point of contact, the shipping person that

4 they would contact out there to arrange for the pick up of this

5 equipment.

6 Q. Okay. And the size and weight of the crate, is that

7 right?

8 A. Yes, that's correct.

9 Q. The price and then when and where it's to be delivered,

10 is that correct?

11 A. That's correct.

12 Q. So you didn't just say to the people at Logistics, hey,

13 we have a crate?

14 A. No, sir.

15 Q. You told them we have a piece of equipment?

16 A. That's correct.

17 Q. It's from Dage Precision Industries?

18 A. That's correct.

19 Q. Before this e-mail was sent by you, you obviously

20 received a quote from Logistics for the price for shipping?

21 A. Yes, I did.

22 Q. Did that come to you verbally or by writing, if you know?

23 A. It came verbally, I believe it also came in an e-mail

24 with the initial quote on it.

25 Q. Did you get any other quotes from Logistics, in other

29

1 words, did they give you alternative quotes in any way?

2 A. No.

3 Q. Did you ask for a lower price when you got the quote?

4 A. No, I didn't, because I didn't know anything about

5 shipping this big of equipment, so that quote sounded

6 reasonable to me.

7 Q. Do you know anything about the class of various freight

8 shipments?

9 A. No.

10 Q. Once you sent this e-mail to Mr. Fanzini, did you receive

11 any further documents confirming that you had made these

12 arrangements with Logistics?

13 A. No, I didn't. Not that I can recall.

14 Q. Did you receive any documents, further documents from

15 Logistics about the details of this shipment; who the trucker

16 would be, for example?

17 A. No, I did not.

18 Q. When was the first time that you became aware that

19 Central Transport was actually physically moving the equipment?

20 A. When it was delivered to our facility.

21 Q. When Central Transport picked up the equipment in

22 California, does anyone give you a confirmation that it's been

23 picked up?

24 A. No.

25 Q. Okay. And between the date of pick up and we know or we

30

1 will know soon that the pick up occurred on February 5th, and

2 the delivery occurred on February 14th. In that period of

3 time, are you aware of any contact with either Central

4 Transport or Logistics, that you're in contact with those?

5 A. I called Logistics Plus a couple times just to check on

6 the progress of the freight, to make sure it was on time to our

7 facility because we had already arranged for riggers to come to

8 move the equipment for us.

9 Q. Is that Rog's?

10 A. Yes.

11 Q. Were you present when the equipment arrived on February

12 14th?

13 A. Yes, I was.

14 Q. And who else was there, if you remember?

15 A. Ernie Carlson was there, the riggers were there, and we

16 had several employees out there just for kind of logistics

17 support, so when he opened up the crate, we could get the

18 equipment moved into the facility without a lot of problems.

19 Q. Was there any representative of Logistics Plus present?

20 A. No.

21 Q. What do you remember about your first view of this crate?

22 A. Well, when the truck pulled into the parking lot, they

23 opened up the truck and we could see this crate was all the way

24 in the back of the truck ready to be moved out. And the

25 riggers started to position themselves and Ernie and I were

31

1 trying to look --

2 THE COURT: Slow down.

3 THE WITNESS: I'm sorry. To look at the crate to

4 see if there was any type of damage, like we normally would do

5 when things arrive at our facility. We did see something on

6 the top part of the crate, but we really couldn't tell what

7 that was because there was no room to get into the truck to

8 kind of walk all the way around the crate to look for any

9 damage.

10 BY MR. DELANEY:

11 Q. Did the rigger then remove the crate from the truck?

12 A. Yes, they did.

13 Q. Is this, by the way, a flat bed or is it a boxed trailer?

14 A. It's a boxed trailer.

15 Q. Once on the ground, were you able to examine the crate?

16 A. Yes, we were.

17 Q. What did you see?

18 A. We found more damage to the crate actually when it was

19 being moved off the bed or off the truck, I'm sorry, off the

20 back of the box truck, we saw what looked like some damage on

21 the bottom of the crate and there was more damage on the side

22 and top of the crate that we could see.

23 Q. I'm just going to quickly show you a couple of

24 photographs. This is Plaintiff's Exhibit 10, is that a

25 photograph that's familiar to you?

32

1 A. Yes, that's the portion of the crate that was damaged.

2 Q. Do you know when the photograph was taken?

3 A. It was taken after the crate was put on the ground at our

4 facility.

5 Q. Let me show you what's been marked as Plaintiff's Exhibit

6 12, is that photograph familiar to you?

7 A. Yes, it is. That's the photograph of the damage on the
8 bottom of the crate, after it was taken off the back of the
9 truck.

10 Q. Once it was on the ground, were you able to open the
11 crate?

12 A. Yes, we were.

13 Q. By the way, was the crate locked in any way?

14 A. No.

15 Q. Was it sealed with any kind of shipping bands around it?

16 A. No, it wasn't.

17 Q. Did you see any markings on the crate indicating that do
18 not open?

19 A. No.

20 Q. How was the crate fastened together?

21 A. The sides were all fastened with bolts, through nuts and
22 bolts, it looked pretty sturdy.

23 Q. When you wanted to open it, did it take much effort to
24 get it open?

25 A. Not a lot of effort to open it, just remove the nuts and

1 bolts and the side would come right off.

2 Q. Once you opened the crate and looked inside, did you see

3 damage to the equipment?

4 A. Yes, we saw more damage to the tray on the front portion

5 of the equipment.

6 Q. I'm showing you Plaintiff's Exhibit 15 on the screen, is

7 that photo familiar to you?

8 A. Yes, it is.

9 Q. What does it depict?

10 A. It depicts the damage that's on the inside of the crate

11 to the equipment that was the X-ray machine. The front portion

12 looked like it was bent.

13 Q. Is that an accurate depiction of the damage you saw on

14 February 14th?

15 A. Yes, it is.

16 Q. Let me show you one other picture, Plaintiff's Exhibit

17 18. Is that photograph familiar to you?

18 A. Yes, it is.

19 Q. What does it depict?

20 A. That depicts the bottom of the machine, the bottom of the

21 crate where it looked like it had gone through the flooring of

22 it.

23 Q. Mr. Mullen, when you looked at this piece of equipment,
24 when you opened the crate, when you examined the crate itself,
25 did you reach any conclusion about how the damage to the crate

34

1 and the damage to the machine had occurred?

2 MR. COHEN: Objection, foundation.

3 THE COURT: It's a foundational objection.

4 BY MR. DELANEY:

5 Q. Did you have an opportunity to look at the entire crate
6 itself?

7 A. Yes, I did.

8 Q. Did you have an opportunity to look inside?

9 A. Yes, I did.

10 Q. Did you have an opportunity to see the type of damage
11 that was done to the crate?

12 A. Yes, I did.

13 Q. Did the damage appear to be mostly on one particular side
14 or was it the whole way around the crate?

15 A. It looked to me to be in one main area.

16 Q. Would that be the back of the machine or the front where
17 the shelf was?

18 A. More in the front of the machine.

19 Q. Based on those observations, could you -- based on where
20 the damage occurred and the nature of the damage, could you
21 reach a conclusion about what apparently happened in damaging
22 the crate?

23 MR. COHEN: Objection, foundation.

24 THE COURT: Overruled.

25 BY MR. DELANEY:

35

1 Q. Go ahead.

2 A. Yes, we thought that it perhaps had been dropped.

3 Q. Now, the truck driver has a receipt for this package,
4 does he not?

5 A. Yes, he does.

6 Q. Did he offer that receipt to you?

7 A. Yes, he did.

8 Q. What did you do?

9 A. I signed for the equipment. Because we were getting

10 ready to handle it ourselves off the back of the truck.

11 Q. Did you note anything on the receipt?

12 A. No.

13 Q. Where is Mr. Carlson when you're signing the receipt?

14 A. He may have gone back into the building. I don't quite

15 remember who all was standing around when I signed for that.

16 Q. When Mr. Carlson came back with a camera -- do you

17 remember him retrieving a camera?

18 A. Yes.

19 Q. When he came back with a camera, was the truck driver

20 still there?

21 A. No, I believe he was already leaving our facility.

22 Q. When you and Mr. Carlson come back together, he with the

23 camera, is there any discussion about what should be done next?

24 A. Yes, there was. So I immediately contacted Logistics

25 Plus and asked for Chris Fanzini. I told him that the

36

1 equipment had arrived but it appeared to have been damaged in

2 shipping.

3 Q. And do you know what happened after that?

4 A. After that he told me that he would get in touch with
5 Central Transport and then we would figure out what we had to
6 do.

7 Q. Did Central Transport send a person to Accu-Spec on that
8 day, February 14th?

9 A. Yes, they did.

10 Q. Do you know who that person was?

11 A. It was George Horetsky.

12 Q. And did this gentleman have an opportunity to look at the
13 crate?

14 A. Yes, he did.

15 Q. And did he get to see inside of the crate, the damage to
16 the equipment?

17 A. I don't really remember if he looked inside the crate, we
18 put the walls back on at that time or if we left them off, I
19 don't really remember.

20 Q. Do you remember any part of your conversation with Mr.
21 Horetsky?

22 A. Yes. He told us that it looked like damage that had been
23 done in shipping.

24 Q. Did he tell you what would happen next?

25 A. No, he didn't. I was to contact Logistics Plus.

37

1 Q. Do you know if Mr. Horetsky was on site for a long period
2 of time or how long he was on site?

3 A. It wasn't very long.

4 Q. What happened to the equipment after Mr. Horetsky left?

5 A. Logistics Plus sent another truck out and they picked the
6 equipment back up and signed for it and took it back into their
7 custody.

8 Q. Okay. Do you know if it was a Central Transport truck
9 that came back and picked the equipment up to take it to a
10 warehouse or was it another trucking company?

11 A. I don't remember if it was another trucking company or
12 not.

13 Q. Do you know where it was taken?

14 A. It was taken to Logistics Plus warehousing facility.

15 Q. Do you know how long the equipment stayed there?

16 A. It was probably there about four months.

17 Q. Now, at the same time that you're speaking with Logistics

18 Plus and Mr. Horetsky, are you making any effort to contact the

19 manufacturer of the equipment?

20 A. Yes, we did.

21 Q. And that's Dage, is it not?

22 A. That's correct.

23 Q. Who did you speak with or who did you contact?

24 A. We contacted our salesperson, the rep out there, Joe

25 Fisher.

38

1 Q. All right. Do you remember how you communicated with

2 him, was it over the phone, was it e-mail, was it

3 correspondence?

4 A. Initially it was by phone.

5 Q. And was an effort made to send the digital photographs of

6 the equipment and crate to Mr. Fisher?

7 A. Yes, it was.

8 Q. And were you successful in sending them?

9 A. Yes.

10 Q. I'm going to show you what we marked as Plaintiff's

11 Exhibit 24, it's several pages, take a look at them and see if

12 they're familiar to you?

13 A. Yes, these are all familiar to me.

14 Q. What are they?

15 A. Those are the correspondence with Joe Fisher at Dage

16 Industries asking him about the machine and the damage that was

17 caused in the integrity of the machine.

18 Q. I'm going to try to put this up on the screen; is this

19 your e-mail to Mr. Fisher?

20 A. Yes, it is.

21 Q. This is the first page of Exhibit 24, is it not?

22 A. Yes, it is.

23 Q. In fact, I'll give you a copy in the event I don't get

24 the whole page on the screen. Here's a copy of Exhibit 24 so

25 you can double check what I'm saying. Is that the first page

39

1 of Exhibit 24?

2 A. Yes, it is.

3 Q. I'm sorry, this is from Fisher to you, is it not?

4 A. Yes, it is.

5 Q. Is this after Mr. Fisher has received the digital

6 photographs?

7 A. Yes, it is.

8 Q. Could you please read into the record, start at the

9 beginning and I'm not going to have you read the whole thing,

10 but I'd like you to read the first few sentences of that

11 paragraph after the salutation, Jim?

12 A. "I have looked at the pictures and I am afraid the

13 machine may be totaled. The main problem is apparent in

14 picture P2140333. It shows that the corner is crumpled. This

15 system is lined with lead to prevent significant levels of

16 X-rays from escaping from the machine. There is no

17 significant" --

18 THE COURT: That's incorrect, you didn't read that

19 right. You said there is no, there is no no there.

20 BY MR. DELANEY:

21 Q. Reread that sentence.

22 A. I'm sorry, "there is a significant safety risk if the

23 lead is compromised and you should not try to use the system as

24 it is. The machine should be returned to our Alyesbury,

25 England facility for further evaluation to see if it can be

1 repaired or if it is a total loss. Please refer to section one

2 of the engineering guide for further explanation on the safety

3 implications. I have attached it to this e-mail."

4 Q. I'm going to stop you there. I'm going to show you

5 next -- is this e-mail from you to Mr. Fisher?

6 A. Yes, it is.

7 Q. What does it say?

8 A. It says "Joe, do you think that the integrity is still

9 okay. Is there any chance of a leak?"

10 Q. Let me show you the next page. On this third page of

11 Exhibit 24 is Mr. Fisher essentially repeating what he said in

12 the first message that he sent to you about the safety issues?

13 A. Yes, he is.

14 Q. Does he tell you not to power it up, that second

15 paragraph?

16 A. Yes, he's telling us not to power the machine up.

17 Q. Do you see where he says in that second paragraph, second

18 sentence, I believe, my main concern is for the safety of you

19 and for the safety of myself. Had you asked whether he could

20 simply come and test it in Erie?

21 A. I believe we inquired about how we could get it fixed

22 without returning it to England.

23 Q. Let me show you the next message. Is this your message

24 to Mr. Fisher?

25 A. Yes, it is.

41

1 Q. When you say we are sending it back out today, do you

2 mean away from Accu-Spec or do you mean all the way back to

3 England?

4 A. We were sending it away from Accu-Spec.

5 Q. And you asked whether there's any problem with it simply

6 sitting?

7 A. Yes.

8 Q. And then the last page, does he get back to you on that

9 question?

10 A. Yes, he does.

11 Q. What does he say?

12 A. He says no, there is only a danger when it is powered up.

13 Q. All right. Jim, do you see the opening of each message

14 has a from and a to?

15 A. Yes.

16 Q. Identify people, and then a time, do you see the time?

17 A. Yes.

18 Q. I was completely confused by the times. But Mr. Fisher
19 is in California, is he not?

20 A. Yes, he is.

21 Q. There is a compete time difference when these messages
22 are recorded, is that correct?

23 A. Yes.

24 Q. All right. After the machine was taken to Logistics
25 Plus's warehouse, did you have any further involvement in it?

42

1 A. Yes, I did.

2 Q. And what involvement did you have?

3 A. At first we went over just to make sure it was there okay
4 and it was stored. And then shortly thereafter, I contacted
5 Logistics Plus to file a claim. And at that time I was told to
6 file a claim with Central Transport.

7 Q. Okay. And ultimately was a claim filed with Central
8 Transport?

9 A. Yes, there was an initial claim filed with Central
10 Transport.

11 Q. All right. Had you ever filed this sort of a claim

12 before by the way?

13 A. No.

14 Q. Did you know if there were any particular forms you had

15 to use?

16 A. I had no idea.

17 Q. Ultimately, was the machine sent back to England?

18 A. Yes, it was.

19 Q. Do you know when it was returned?

20 A. Somewhere around September, October of 2003.

21 Q. Okay. Let me take that exhibit, my copy back from you.

22 Based upon your observations of the crate and your observations

23 of the damage to the machine, is there any way that, based upon

24 your observations, is there any way that you think that this

25 machine could have shifted in the crate and caused this damage?

43

1 MR. COHEN: Objection, foundation, your Honor.

2 THE COURT: Overruled.

3 THE WITNESS: No.

4 MR. DELANEY: That's all I have, thank you, Mr.

5 Mullen.

6 THE COURT: We're going to take a short recess.

7 (Recess from 10:10 a.m.; until 10:25 a.m.)

8 THE COURT: All right, Mr. Cohen.

9 MR. COHEN: Thank you, your Honor.

10 CROSS-EXAMINATION

11 BY MR. COHEN:

12 Q. Good morning, Mr. Mullen.

13 A. Good morning.

14 Q. You testified that your employment history is in sales,

15 is that correct?

16 A. It is right now, yes.

17 Q. Going back, after the military, you were in sales?

18 A. No, I was more like a supervisor for production.

19 Q. What did you do as when you were a supervisor for

20 production, what were your job duties?

21 A. My job duties at Advocom Electronics, I was the

22 production manager.

23 Q. And as the production manager, what were you doing?

24 A. I supervised the group of employees that built electronic

25 kit assemblies.

1 Q. And at Accu-Spec you were a project manager, is that

2 correct?

3 A. Yes, I was.

4 Q. What were your job duties as a project manager?

5 A. One of my duties was shipping and receiving, I was

6 responsible for the warehouse and for product that came into

7 and out of the building. I was also responsible for the

8 training of employees, facilities maintenance. And other

9 little responsibilities that I was assigned by Ernie and the

10 operations manager.

11 Q. How much of your time was spent monitoring the shipments?

12 A. A good part of my day was spent watching shipments going

13 out of the facility or the receiving part of it.

14 Q. Mostly UPS type shipments, is that correct?

15 A. Yes, that is correct.

16 Q. The kind that Ernie described, that had bubble wrap and

17 things like that, correct?

18 A. Yes, that's correct.

19 Q. They weren't of a significant weight, is that also right?

20 A. No, they were not.

21 Q. It's fair to say that very rarely was a large shipment

22 moved in or out of Accu-Spec such as the weight of this two-ton

23 machine?

24 A. Yes, that's correct.

25 Q. Is it fair to say that in your experience -- well, you

45

1 had very limited experience observing the packaging

2 characteristics of freight that heavy?

3 A. Yes.

4 Q. Is it fair to say you have really no or you have very

5 limited or almost no experience in actually packing that kind

6 of freight?

7 A. That's correct.

8 Q. Now, besides UPS, what other transportation or shipping

9 companies did you use?

10 A. Well, we would use FedEx on occasion.

11 Q. Any other companies?

12 A. No.

13 Q. Why did you start using Logistics Plus?

14 A. Well, when I took over in the shipping area, I found it
15 was easier to use one company whose expertise was shipping, as
16 on opposed to using my time to call around different trucking
17 companies to get quotes. It just made sense to me from a
18 business standpoint to use them.

19 Q. Besides FedEx and UPS, what other trucking companies were
20 you calling before Logistics Plus?

21 A. I don't really recall. We may have used a couple local
22 companies for some local deliveries between Erie and like
23 Pittsburgh.

24 Q. Did your switch to Logistics Plus coincide with the time
25 that your son-in-law was employed there, is that fair to say?

46

1 A. Yeah.

2 Q. I mean the reason you began shipping with Logistics Plus,
3 he told you about what they do, you thought it was a good idea,
4 is that fair to say?

5 A. Yes, that's fair to say.

6 Q. When did you first learn about Logistics Plus, was it
7 during your conversation with your son-in-law at your home?

8 A. No, actually, he had called out to our facility to tell

9 me about the company he was working for.

10 Q. He was looking for some business, is that fair to say?

11 A. Not really because he knew we shipped mostly UPS.

12 Q. Did you ever talk with your son-in-law about the type of

13 business that you worked in?

14 A. Yes.

15 Q. Did you tell him about this particular shipment, beyond

16 what's in that e-mail?

17 A. I don't really recall. I usually try to keep -- if I was

18 contacting them, I tried to keep it business. I didn't really

19 talk about work stuff outside of work.

20 Q. Do you get along with your son-in-law, Chris?

21 A. Yes.

22 Q. Does he go over your house for holidays and the whole

23 son-in-law thing?

24 A. Yes.

25 Q. At the time the shipment was made, how long had he been

1 married to your daughter?

2 A. Couple of years.

3 Q. You testified that once you were instructed by Ernie that
4 you needed to make arrangements for this freight, that you
5 contacted Chris, is that right?

6 A. That's correct.

7 Q. And you testified that you gave him the weight, the
8 dimensions, the origin and the destination?

9 A. That's correct.

10 Q. Did you give him any other information?

11 A. I referred to it as equipment, I just told him we needed
12 the equipment picked up in California.

13 Q. Did he ask you what it was?

14 A. I don't recall if he specifically asked me what it was.

15 Q. That was a telephone call, correct?

16 A. Yes.

17 Q. Was he able to give you a rate on the spot or did he have
18 to call you back?

19 A. He had to call back.

20 Q. How long did it take him to call you back?

21 A. I don't really remember, maybe a few hours, I don't
22 recall. And then we started using e-mails.

23 Q. All right. Let's start with the calls then, if you

24 remember. Explain to me what the next communication was with
25 your son-in-law about this transportation?

48

1 A. Well, he gave me a quote for what it would cost to move
2 the freight from California to our facility.

3 Q. Let's stop right there. How much was it?

4 A. \$590.

5 Q. That was the first quote, that was the quote?

6 A. Yes, it was.

7 Q. And then after he gave the quote, I don't mean to
8 interrupt you, I apologize, after he gave you the quote for
9 \$590, what happened next?

10 A. Well, I agreed with that quote, to me it sounded
11 reasonable because I didn't know about shipping that type of
12 freight. So I accepted that and sent him the information on
13 picking up the equipment.

14 Q. And the information is what we just discussed, correct?

15 A. Yes.

16 Q. Did he call you back with another rate?

17 A. Not that I remember, no.

- 18 Q. How strong is your memory with respect to the
19 communications related to the transportation of this freight?
20 A. Well, with the exception of the e-mails, and that's why I
21 tried to do stuff on e-mails, so I would have a record of what
22 I was doing.
23 Q. So without the e-mails, your recollection is pretty
24 foggy, is that correct?
25 A. I only recall just asking him to move the freight and get

49

- 1 me a quote on it.
2 Q. Have you read Chris Fanzini's deposition before your
3 testimony today?
4 A. No.
5 Q. Would you be surprised if you knew that that deposition
6 testimony indicated that he called you, gave you a quote, and
7 that he said you asked for a better rate?
8 A. Would it surprise me, yeah, it would.
9 Q. Are you one-hundred percent absolutely certain that you
10 didn't ask Chris to get you a better rate?
11 A. Am I one-hundred percent sure, no, I'm not one-hundred

12 percent sure.

13 Q. And it's your testimony Chris didn't call you back a

14 second time with a lower rate?

15 A. Not that I recall, no.

16 Q. I take it you did not talk to Chris about the specialized

17 nature of this equipment, correct?

18 A. That's correct.

19 Q. You didn't ask for any special precautions to be taken in

20 the transportation of this equipment, is that correct?

21 A. No, I didn't specifically ask for any.

22 Q. You didn't ask for any particular liability protection

23 for this expensive, high-tech shipment, did you?

24 A. No.

25 Q. Should you have?

50

1 A. Well, I don't believe I should have. My thought process

2 was that I called a shipping expert, a company that did this

3 for a living, and they told me they would move our equipment

4 for us. So I didn't feel I needed to do anything else.

5 Q. If there was a limitation of liability, should Chris have

6 told you that?

7 A. No, I wasn't aware of a limitation of liability.

8 Q. If there was, do you think Chris should have told you

9 about it?

10 A. Yes.

11 Q. What did you know about this piece of equipment; in other

12 words, did you know anything besides it's an X-ray machine and

13 it's coming from California?

14 A. No.

15 Q. What did Ernie tell about this machine?

16 A. Well, that they had bought an X-ray machine to help with

17 the quality of our work, that it needed to be picked up in

18 California and delivered to our facility.

19 Q. I'm going to show you a document, sir, I'm going to make

20 it very easy, I'm going to provide, with the court's

21 permission, a set of exhibits for the witness?

22 THE COURT: That's fine.

23 BY MR. COHEN:

24 Q. Sir, would you please flip to what is identified as CT-2,

25 okay, is that your signature on the bottom of this document?

1 A. Yes, it is.

2 Q. And what is this document?

3 A. The packing slip or the receipt for the X-ray machine

4 that was delivered to our facility.

5 Q. Did you understand that you were signing a document, you

6 were signing for the receipt of the freight in good order?

7 A. Yes.

8 Q. You testified that you signed this receipt -- well, let

9 me ask you this. The truck pulls up, the doors opened, the

10 rigger, the forklift shows up. The rigger pulls up to the back

11 of the truck, pulls out the freight, puts it on the ground. It

12 wasn't opened yet, is that when you signed the delivery

13 receipt?

14 A. Yes.

15 Q. Did you ask the truck driver to stick around?

16 A. No.

17 Q. Did the truck driver stick around until the door was

18 opened?

19 A. No, he did not.

20 Q. He wasn't there, he didn't see the machine on the inside?

21 A. I don't believe he did. I was really kind of busy
22 worrying about what had happened to the machine or what we were
23 going to do next.
24 Q. I'd like you to flip to Exhibit 9, please, this is a
25 document marked CT-9. This was included in one of the claims

52

1 submitted to Central Transport; do you know what it is?
2 A. Yes.
3 Q. What is it?
4 A. It's a form that was filled out by a gentleman who came
5 over to do an inspection on the equipment or on the crate and
6 on the X-ray machine for the damages.
7 Q. Okay, let's find out when he did that, let's look on the
8 top there and the right-hand side where it says "date
9 inspected." What date did he come in and do that?
10 A. He did the inspection on 2/19.
11 Q. Okay. And the date delivered was 2/14, is that true?
12 A. That's correct.
13 Q. You understand that the trucking company caused this
14 inspection to take place, correct?

15 A. Yes.

16 Q. Do you know what a tip and tell device is?

17 A. Yes, I do.

18 Q. How do you know?

19 A. It was on the front of the crate.

20 Q. What is it?

21 A. It's a device like, I believe, that would tell if a crate

22 was tipped over or somehow damaged or dropped.

23 Q. This inspector's report indicates that the tip and tell

24 was not activated, do you see that?

25 A. Yes, I do.

53

1 Q. Do you agree that the tip and tell was not activated?

2 A. I wouldn't really be able to tell on that because I don't

3 know how activated it would be. I'm not an expert in that.

4 Q. I'm going to ask you to flip to another exhibit in there,

5 sir, it's number 8. If you can tell me -- well, this is the

6 first claim that Accu-Spec filed with Central Transport, is

7 that correct?

8 A. That's correct.

9 Q. And it's listed as \$120,000 there and subsequently,

10 because you learned the actual damage, you changed that,

11 correct?

12 A. That's correct.

13 Q. Did you fill this form out and sign it on the bottom, is

14 that your signature?

15 A. Yes, it is.

16 Q. Did you read it before you signed it?

17 A. Yes, I did.

18 Q. Did you read the section in the gray box?

19 A. Yes.

20 Q. Did you ask anybody at Accu-Spec whether the equipment

21 was new or used?

22 THE COURT: I can't read that, I presume the jury

23 can't, either.

24 MR. COHEN: I'll blow up the section, your Honor,

25 thank you.

1 BY MR. COHEN:

2 Q. I will also read it aloud for the record. In the gray

3 box it says "please be aware that our standard liability limit

4 is \$10 per pound per container, (10 cents per pound for used

5 articles)." And then there's another sentence, it goes on to

6 say "please check your rules tariff for details." The question

7 is did you ask anybody at Accu-Spec whether the freight was new

8 or used before you filed this claim for over \$120,000?

9 A. No.

10 Q. You said you read that gray box before you signed it,

11 correct?

12 A. That's correct.

13 Q. Did you ask to look at or try to look at on the Internet

14 or anything the Central Transport rules tariff?

15 A. No, I didn't.

16 Q. If you could, sir, turn to Exhibit 10, please. If you

17 could tell the jury what this is?

18 A. This is a second claim re-adjusted after we had the

19 machine inspected by somebody from Dage.

20 Q. Okay. And did you sign this particular claim form?

21 A. Yes, I did.

22 Q. And did you read this one?

23 A. Yes.

24 Q. Again, when you filed this supplemental claim form, did

25 you ask anybody if the machine was new or used?

55

1 A. No, I did not.

2 Q. Did you check the tariff, the rules tariff for details?

3 A. No.

4 Q. Sir, I have placed on the screen Plaintiff's Exhibit 13.

5 Do you see any internal support bracing for the machine at the
6 top?

7 A. Not in that picture I don't, no.

8 Q. Are there any pictures that show support bracing at the
9 top of the machine?

10 A. Not to my knowledge, no.

11 Q. Was this support bracing at the top of the machine?

12 A. I don't believe so.

13 Q. In about the mid point of the machine, do you see support
14 bracing holding the body away from the edge of the crate?

15 A. No, I don't.

16 Q. Is there any photograph that you think shows that?

17 A. No.

18 Q. Is it because there was no support bracing holding the

19 body of the machine away from the edge of the crate?

20 A. Yes.

21 Q. Do you see in that photograph any hard foam corner

22 packing on the edges of the shelf or on the top of the machine?

23 A. No, I don't.

24 Q. When you saw the crate, when you opened the crate door,

25 did you see the big corner hard foam packing?

56

1 A. No, I didn't.

2 Q. When you opened the crate, did you see any straps that

3 were bolting this machine and holding it from internally

4 shifting within the box?

5 A. No, I didn't.

6 Q. Do you have any knowledge with respect to the

7 characteristics of tractor-trailer transportation, as far as

8 vibration, natural vibration and movement of a trailer in the

9 normal course of operation?

10 A. No, I don't.

11 Q. Do you have any way of coming to a conclusion as to

12 whether or not -- well, based on that, isn't it fair to say you

13 do not have a basis to come to the conclusion as to whether or
14 not this freight shifted within this box?

15 A. No, I can't come to that conclusion.

16 Q. Is it fair to say you can't come to the conclusion,
17 either yes or no, because you really don't have the experience
18 and knowledge about packaging to do so, is that fair to say?

19 A. Yes, it is.

20 MR. COHEN: Your Honor, at this time I'd like to
21 move in Exhibits 2, 8, 9 and 10.

22 THE COURT: Those are admitted.

23 MR. COHEN: Thank you, your Honor. Thank you, Mr.
24 Mullen, I have no further questions at this time.

25 THE COURT: Mr. Knox.

57

1 MR. KNOX: Thank you, your Honor.

2 CROSS-EXAMINATION

3 BY MR. KNOX:

4 Q. Good morning, Mr. Mullen.

5 A. Good morning.

6 Q. Mr. Mullen, was this one of the more important shipments

7 for Accu-Spec during the 2002 period?

8 A. As far as equipment for the company, yes.

9 Q. Was it one of the more valuable pieces of equipment that
10 you personally would have been trying to ship for Accu-Spec
11 during that time?

12 A. Yes.

13 Q. And, again, how much was this X-ray machine, as far as
14 you knew?

15 A. How much was the value of it?

16 Q. Yes.

17 A. \$120,000.

18 Q. Did you specifically tell Chris Fanzini at any time
19 before the shipment, that this X-ray machine, this item at all
20 was worth \$120,000?

21 A. No.

22 Q. And in your e-mail that's been marked as Defendant CT
23 Exhibit 5, is there any mention in that e-mail as to the value
24 of this shipment?

25 A. No, it's not.

1 Q. You had mentioned, I believe, that there were e-mails in
2 your testimony, if I heard you correctly, around this time with
3 Mr. Fanzini. But isn't there really only one e-mail from you?

4 A. Yes.

5 Q. Did you at any time, Mr. Mullen, tell Mr. Fanzini that
6 this shipment was fragile in any way?

7 A. I don't believe I told him it was fragile.

8 Q. Did you at any time tell Mr. Fanzini that this was in
9 fact an X-ray machine?

10 A. I don't believe I ever called it an X-ray machine.

11 Q. And, again, looking at your e-mails, CT-5 there, is there
12 any mention in that e-mail as to whether this freight is
13 fragile?

14 A. No, there's not.

15 Q. Is there any mention in that e-mail that it is in fact an
16 X-ray machine?

17 A. No, there's not.

18 Q. I believe in response to questions from your attorney
19 that you believe you told Mr. Fanzini that you had "some
20 equipment that you needed to be shipped," was that your
21 testimony?

22 A. Yes.

23 Q. Did you ever tell him at any time what type of equipment,
24 lawn equipment, fishing equipment, medical equipment?

25 A. No, I didn't specify what type of equipment it was.

59

1 Q. Mr. Mullen, I'm trying to understand this transaction.

2 If this shipment is so valuable, I believe you said it's one of

3 the most valuable pieces of equipment that you're shipping

4 during that time, that it was important to the company, why

5 didn't you send any written documentation, e-mail or otherwise,

6 to Mr. Fanzini telling him the importance, the value, the fact

7 that this was fragile?

8 A. Well, I had referred to it as equipment. I gave him all

9 the information about who the contact was at Dage, to get more

10 details on what this was before it was picked up. I had felt

11 that since I accepted that quote to move our equipment, that I

12 really didn't have to do anything else because, again, I hired

13 a company that their expertise was moving freight around the

14 country.

15 Q. But you did not tell him at any time that was an X-ray

16 machine?

17 A. No, I never said it was an X-ray machine.

18 Q. Now, Mr. Mullen, Attorney Cohen touched on this a little

19 bit, but I'd like to flush it out a little bit more. Why did

20 you initially use Logistics Plus to handle various shipments

21 for your company?

22 A. Because the service was offered to us, as opposed to

23 calling different trucking companies to get quotes to move

24 stuff, it was just easier to call one place that did this for a

25 living.

60

1 Q. Isn't it true, that it was your understanding that

2 Logistics Plus, among other things, is in the business of

3 getting good prices on shipping, better than what you can get

4 if you called directly?

5 A. Yes.

6 Q. So they're in the business of getting you a good deal,

7 correct?

8 A. That's correct.

9 Q. Was getting a good deal part of your goal here in

10 contacting Mr. Fanzini?

11 A. No.

12 Q. It wasn't at all?

13 A. No.

14 Q. Mr. Carlson testified earlier here that price didn't

15 matter here, notwithstanding the fact we're shipping a \$120,000

16 machine?

17 A. That's correct.

18 Q. Would you agree with that?

19 A. Yes.

20 Q. And it's your testimony that you didn't get any

21 alternative quotes from Mr. Fanzini, you only got one quote for

22 \$590?

23 A. Yes.

24 Q. Are you aware that he's testified differently in this

25 case?

1 A. No.

2 Q. You haven't reviewed any deposition transcripts in

3 preparation for your testimony?

4 A. No, I have not.

5 Q. Mr. Mullen, is it fair to say that one of the other
6 reasons that you decided to use Logistics Plus is that your
7 son-in-law was in fact working there?

8 A. Yes.

9 Q. Is it fair to say that you trusted your son-in-law's
10 judgment based on his experience in the shipping industry to
11 handle your freight?

12 A. Yes, that's correct.

13 Q. Would you agree that you trusted your son-in-law to take
14 great care and responsibility to use the best efforts to ship
15 your freight?

16 A. Yes.

17 Q. Do you think that if Mr. Fanzini knew that he was
18 shipping a fragile \$120,000 X-ray machine across the country,
19 do you think that he would have done anything irresponsible to
20 have that shipment shipped?

21 A. No.

22 Q. In order for him to do his job, to act responsibly with
23 respect to the freight, would you agree that he has to trust
24 the information that you are giving him?

25 A. Yes.

1 Q. Mr. Mullen, do you know anything about Class 50, Class
2 100, do you know anything about that?

3 A. No, I don't.

4 Q. Do you know if that relates to cheap rates or high rates?

5 A. I couldn't tell you.

6 Q. Do you know if that relates in any way to how items are
7 handled in terms of whether it's more fragile or not?

8 A. No, I don't.

9 Q. As you sit here today, do you now know whether Class 50
10 is one of the cheapest rates to ship by?

11 A. From what I heard yesterday, yes.

12 Q. Knowing what you know now, if you could make the decision
13 today --

14 MR. DELANEY: Objection, your Honor.

15 THE COURT: Sustained.

16 MR. KNOX: I'll withdraw that.

17 BY MR. KNOX:

18 Q. Mr. Mullen, you would agree that the word crate, again is
19 listed in your e-mail, that word is used, correct?

20 A. I do not see the word crate.

21 Q. See where it says "crate size?"

22 A. Crate size, okay.

23 Q. You would agree the word crate is used in that e-mail?

24 A. Yes.

25 Q. Do you know if the word crate was used in a document

63

1 called bill of lading here?

2 A. I believe it was.

3 Q. Do you know if the word crate was on the delivery receipt

4 that you signed that was generated by Central Transport?

5 A. No, I don't recall without looking at it again.

6 Q. Do you know if the word pallet or any abbreviation, plt,

7 was used on the delivery receipt?

8 A. I don't believe it was.

9 Q. What about any other documents from the rigging company,

10 do you know if the word crate or pallet was used to describe

11 this shipment?

12 A. Not that I can remember, no.

13 Q. Did you employ a company by the name of Rog's to handle

14 the unloading of this crate?

15 A. Yes, we did.

16 Q. I want to show you a document that's been marked CT-51,

17 is that an invoice from Rog's with respect to the services

18 rendered here unloading the freight in question?

19 A. Yes, it is.

20 Q. Was that document kept in Accu-Spec's business records?

21 A. Yes, it was.

22 Q. How does Rog's describe the freight in that invoice?

23 A. Well, they describe it as a crate.

24 Q. In fact, isn't the date on this invoice three days after

25 the freight was unloaded and opened?

64

1 A. Yes, it is.

2 Q. And they're still describing it as a crate?

3 A. Correct.

4 Q. They're not describing it as an X-ray machine?

5 A. No, they didn't.

6 Q. Do you know if the term crate is commonly used by

7 companies like Rog's or Logistics or Central to describe

8 freight generically?

9 A. I couldn't tell you.

10 Q. Mr. Mullen, I believe your testimony is you contacted

11 Logistics Plus to negotiate a good rate on a shipment, is that

12 correct?

13 A. I contacted them to move the freight for us.

14 Q. But they don't have any trucks, do they, do you know

15 that?

16 A. No, they don't have any trucks.

17 Q. They're not actually moving the freight?

18 A. No.

19 Q. They are negotiating the price for you, somebody else is

20 moving the freight, correct?

21 A. That's correct.

22 Q. Do you know if Logistics Plus is responsible for the

23 packing of the freight out in California?

24 A. No, they're not.

25 Q. Who's responsible for that?

1 A. The packing would have been done by the company that

2 owned the equipment we were buying.

3 Q. Do you know if Logistics Plus is responsible for stamping

4 things on the outside of freight, such as handle with care,

5 fragile, anything like that?

6 A. No.

7 Q. Do you know who's responsible for that?

8 A. That would be the company that was shipping the equipment

9 to us.

10 Q. And, lastly, do you know if Logistics Plus is responsible

11 for arranging for forklifts and the rigging companies, like

12 Rog's rigging company here, to unload the freight?

13 A. No.

14 Q. Who's responsible for that?

15 A. When it comes to our facility, that would be our

16 responsibility to arrange to have it moved off the truck.

17 Q. What about elsewhere, if it's out in California or Kansas

18 City or wherever?

19 A. Well, if it's being picked up where the freight is

20 shipping from, it would be the company who bought the equipment

21 responsibility to get it loaded on to the truck.

22 Q. I'll ask you a simple question. Is Logistics Plus

23 located in Erie?

24 A. Yes, they are.

25 Q. And this X-ray machine was coming from California,

66

1 correct?

2 A. That's correct.

3 Q. At any time before this shipment moves from California to

4 McKean, is Logistics Plus inspecting that freight?

5 A. No, they're not.

6 Q. Are they handling that freight?

7 A. No.

8 Q. Are they touching it in any way?

9 A. No.

10 Q. If that's the case, wouldn't you agree that Logistics

11 Plus really has no way of verifying what's in that crate?

12 MR. DELANEY: Your Honor, I'd like a side bar.

13 THE COURT: All right.

14 (At side bar on the record.)

15 MR. DELANEY: I'm going to object to this line of

16 questioning. The whole purpose of this line of questioning is

17 to suggest to the jury that Logistics Plus has no liability

18 because it has lack of knowledge because it has lack of

19 information. It's clear that is clearly contrary to the

20 Carmack Amendment. The Carmack Amendment doesn't require any

21 specific information pass to the freight forwarder. It doesn't

22 require that there be notice about the freight, what the

23 freight may be. It is virtually strict liability.

24 MR. KNOX: Part of our defense is saying we are not

25 touching this freight.

67

1 THE COURT: Your liability is completely independent

2 of whether you touch it or not. Your liability arises as a

3 matter of law, if a prima facie case has been made out. I

4 wouldn't let you argue to the jury in closing, for instance,

5 that you can't be liable because you never touched the freight.

6 I'll sustain the objection.

7 (End of discussion at side bar.)

8 BY MR. KNOX:

9 Q. Mr. Mullen, I'm going to show you another document that's

10 been offered into evidence here. This is a picture of the

11 crate, I believe this is Exhibit 9 -- Mr. Mullen, on that

12 picture are there any symbols stamped on the outside of the

13 crate?

14 A. Yes, there are.

15 Q. Is there a wine glass symbol on both sides?

16 A. Yes.

17 Q. Do you know what that symbol means?

18 A. I would say that it would mean it was fragile.

19 Q. Have you seen the X-ray machine in question here?

20 A. Yes.

21 Q. Would you agree that it has a computer screen and other

22 glass components?

23 A. Yes, it does.

24 Q. Mr. Mullen, after this freight arrived at Accu-Spec's

25 facility on February 14, 2003, would you agree that you and Mr.

1 Fanzini were in fact in constant communication about how to

2 deal with this situation?

3 A. Yes, we were.

4 Q. In fact, did you even share e-mails about this situation

5 for months on end?

6 A. Yeah, they were trying to help us throughout to get this
7 settled with Central Transport.

8 Q. Would you agree that the initial formal claim was made
9 against Central Transport and not against Logistics Plus?

10 A. The initial claim was made against Central Transport,
11 yes.

12 Q. Are you still doing business with Logistics Plus?

13 A. No.

14 Q. You're sure about that?

15 A. Yes.

16 Q. Were you doing business after this freight was dropped
17 off in February of 2003 with Logistics Plus?

18 A. Yes.

19 Q. Were you in fact even doing business with Logistics Plus
20 after this lawsuit was filed in the winter of 2004 -- I'm
21 sorry, winter of 2003?

22 A. Yes.

23 Q. Do you know anything about forklifts?

24 A. I know that they have weight restrictions and they have
25 different sizes for moving different sizes of freight.

1 Q. Do you know if forklifts are rated at pound limits?

2 A. Yes, they are.

3 Q. Are there forklifts rated for 5,000 pounds?

4 A. Yes, I would believe so.

5 Q. Are there forklifts rated at 10,000 pounds?

6 A. I would believe so, yes.

7 Q. Do you at Accu-Spec or do you engage a contractor for

8 Accu-Spec that uses 10,000 pound forklifts?

9 A. We did in the case of this X-ray machine, yes.

10 Q. When was that used?

11 A. The forklift was used to remove the crate that the X-ray

12 machine was in from the back of the truck.

13 Q. Are you aware of any letter or marking on the outside of

14 this crate that talks about the need for the use of a 10,000

15 pound forklift?

16 A. No, I don't recall that.

17 Q. Do you recall seeing a letter on the outside of this

18 crate at all generated by Dage?

19 A. (No audible response.)

20 Q. I'm going to show you a picture here --

21 A. Yes, okay.

22 Q. Again, this picture is Exhibit 9, do you see this?

23 A. Yep.

24 Q. It's kind of hard to see it over here, (indicating), were

25 there letters put on the outside of the crate?

70

1 A. Yes, there were.

2 Q. Do you know what those letters said?

3 A. No, I don't.

4 MR. KNOX: Your Honor, the picture didn't come out

5 too well, may I show the jury?

6 THE COURT: Yes.

7 (Whereupon, Plaintiff's Exhibit 9 was published to

8 the Jury.)

9 BY MR. KNOX:

10 Q. Just so you can see that, too, Mr. Mullen, do you see the

11 two letters there?

12 A. Yes, I do, thank you.

13 MR. KNOX: I have nothing further.

14 THE COURT: Any further redirect of Mr. Mullen?

15 MR. DELANEY: Yes, your Honor.

16 REDIRECT EXAMINATION

17 BY MR. DELANEY:

18 Q. I may have asked you this, Mr. Mullen, when you were in
19 the parking lot at Accu-Spec on February 14th, did you see the
20 forklift remove the crate from the truck, from the Central
21 Transport truck?

22 A. Yes, I did.

23 Q. Did you see anything about that operation that would have
24 caused the damage that you observed and we looked at in the
25 pictures?

71

1 A. No, I did not, those guys were very careful.

2 MR. DELANEY: Thank you, that's all I have.

3 THE COURT: Anything further by way of recross?

4 MR. COHEN: No, thank you, your Honor.

5 THE COURT: Thank you, Mr. Mullen, you're excused.

6 Call your next witness.

7 MR. DELANEY: Your Honor, the next piece of evidence

8 I'm going to put in is really a document and it has been marked

9 as Exhibit 25. And this is the bill of lading signed by the
10 Central Transport trucker on February 5, 2003, in California.

11 THE COURT: Is that Plaintiff's 25?

12 MR. DELANEY: It is Plaintiff's No. 25.

13 THE COURT: It's admitted.

14 MR. DELANEY: May I publish it to the jury?

15 THE COURT: You may.

16 MR. DELANEY: And just to slide it up, your Honor,
17 there is a Central Transport emblem on the lower left-hand side
18 and the signature is that of the Central Transport trucker.
19 I'm introducing this to show the absence of any notation of
20 damage.

21 MR. COHEN: Your Honor, I object to testimony from
22 the attorney regarding that exhibit. He can introduce it into
23 the record, however, testimony without a witness I'd object to.

24 MR. DELANEY: I'll refrain and wait for closing.

25 THE COURT: All right.

1 MR. DELANEY: Thank you, your Honor. Your Honor,
2 the next witness we have is Mr. Fisher, who is in Austin,

3 Texas.

4 THE COURT: When is he available?

5 MR. DELANEY: He's available at one o'clock.

6 Frankly, he has to go from this job site to the studio where

7 he's going to be, so it might be 1:10.

8 THE COURT: I've moved my sentencing to 1:30. So I

9 hope it's closer to 1 o'clock.

10 MR. DELANEY: We'll try to do that.

11 THE COURT: If he could get there by one, that would

12 be helpful. Is there a deposition transcript that is going to

13 be read into the record in this case?

14 MR. DELANEY: No.

15 THE COURT: So what you're telling me right now is

16 you don't have any witnesses to fill up any time between now

17 and one o'clock, is that correct?

18 MR. DELANEY: That's correct, your Honor. Mr.

19 Fisher is the last evidence that we'll introduce.

20 THE COURT: Let me see you at side bar.

21 (At side bar on the record.)

22 THE COURT: It's 11:10. There's two things we can

23 do. Just send this jury away to 1 o'clock or start your case

24 out of turn, which I'm inclined to do. Do you have folks you

25 can start with?

73

1 MR. COHEN: Yes, I do.

2 THE COURT: Let's do that.

3 (End of discussion at side bar.)

4 THE COURT: Members of the jury, so we just don't

5 have down time, unnecessary down time, even though Mr. Delaney

6 hasn't quite finished his case, because he has one more witness

7 that, as you heard, needs to be called, we're going to switch

8 over and permit the defendants to start or at least one

9 defendant to start calling a witness or witnesses just to keep

10 things moving. So, Mr. Cohen, go ahead.

11 MR. COHEN: Thank you, your Honor. Central

12 Transport calls George Horetsky.

13 THE COURT: Would you spell your name for my court

14 reporter, please?

15 THE WITNESS: H-o-r-e-t-s-k-y.

16 GEORGE HORETSKY, CENTRAL TRANSPORT WITNESS, SWORN

17 DIRECT EXAMINATION

18 BY MR. COHEN:

19 Q. Good morning, Mr. Horetsky.

20 A. Good morning.

21 Q. Could you please state your name and your work address

22 for the record?

23 A. George Horetsky, our terminal is at Holland Street in

24 Falconer, New York.

25 Q. And if you could tell me what your job title is and where

74

1 you work?

2 A. I'm an account executive, I work out of the Jamestown

3 terminal.

4 Q. What is the name of the company?

5 A. Central Transport International.

6 Q. How long have you worked for Central Transport?

7 A. Fourteen-and-a-half years.

8 Q. If you could describe for the jury your background, your

9 work at Central Transport over those 14 years?

10 A. Over the 14 years I've worked in various positions,

11 including sales, operations, I was the terminal manager. I was

12 also an internal auditor for the company for two years. I'm

13 currently an account executive, salesman.

14 Q. As an account executive, describe for the jury what your

15 duties are, what do you do?

16 A. Primarily I negotiate contracts with local customers.

17 Try to set up programs to help them meet their transportation

18 needs, through pricing, services that we offer. Explain the

19 lanes that we service, how we can benefit them and help them

20 meet their transportation needs.

21 Q. Was Logistics Plus one of your customers?

22 A. Yes, they were what I would consider a partner.

23 Q. When you say a partner, what type of business does

24 Logistics Plus perform briefly, the jury's heard some?

25 A. They would be a third-party logistics company or freight

75

1 forwarder. They would basically be a middleman for accounts.

2 Q. And would you consider them a sophisticated player in the

3 logistics field?

4 A. Yes, I would, very successful.

5 Q. How long has Logistics Plus been a customer of yours?

6 A. For Central Transport, I would say at least eight years.

7 For myself, calling on the account, roughly three years.

8 Q. How many times has Central Transport moved freight for

9 Logistics Plus?

10 A. Throughout the company numerous -- I'm sure thousands of

11 times we have moved freight.

12 Q. Did Logistics Plus and Central Transport have an

13 arrangement with respect to pricing for the transportation of

14 freight?

15 A. As we do with most of our accounts, we had a negotiated

16 discount program in place for Logistics Plus.

17 Q. When you say discount program, if you could briefly and

18 generally explain to the jury what you mean?

19 A. We have base rates and tariff rates that we work off of.

20 Where we basically come up with the rates that we charge

21 customers. Certain customers because of the volume they can

22 do, they can bring to the table for us, we allow more of

23 discount percentages. So we have, basically, a discount

24 program in place with them.

25 Q. Is that a discount based on the classification of the

1 freight?

2 A. Class would come into play on shipments, yes, it would.

3 Q. Now, what I'd like you to explain to the jury is in

4 general, when a customer calls to move freight, what are the

5 options you have as far as how to ship that freight for an

6 established customer like Logistics Plus?

7 A. Well, many customers can go right to our Web site and

8 they know the discounts, so they can pull it right off of

9 there. If a customer calls, we will basically go to our rate

10 department, give them the required information that we need to

11 know to properly rate the shipment. Our rate department will

12 already have their discount programs available so they can come

13 up with the rates and we would communicate that to the

14 customer. So they could call to get the rate, they could go

15 online and get the rate or e-mail. There are various ways they

16 could contact us to get what the rate would be.

17 Q. For a customer such as Logistics Plus that you have a

18 relationship with, what are the types or kinds of rates that

19 you could quote?

20 A. We offer a number of different rates, everything from

21 actual class discount rates to spot rates, where we would look

22 at various lanes that we're moving freight in. If we need more
23 freight in that lane, we might be able to give them even more
24 of a discount that they could capitalize on. That would be
25 true for any customer.

77

1 Q. You're using a lot of trucker talk lingo, I want to slow
2 it down a little bit and break this up. Let's talk about spot
3 pricing for a second?

4 A. Okay.

5 Q. What information do you need from the shipper or in this
6 case the freight forwarder, Logistics Plus, in order to give
7 them a spot price?

8 A. Spot pricing, we're basically selling the space on a
9 trailer moving from point A to point B. So what would be
10 required would be the origin zip code, destination zip code.
11 The weight of the shipment and generally how much room it's
12 going to take up on the trailer. We use usually will get
13 linear foot.

14 Q. Now, if you were going to give a rate based on an
15 established customer's discount program, what information do

16 you need for that quotation?

17 A. The origin zip code, the destination zip code, the

18 weight, and then we would ask for the class of the freight.

19 Q. Now, there's going to be other testimony in more detail

20 about the class of the freight, if you could in general

21 describe to the jury what do you mean by the class of the

22 freight?

23 A. Class of the freight is basically set forth by the

24 National Motor Freight Organization. We utilize a

25 classification guide where pretty much anything and everything

78

1 that could possibly be shipped is given a class. In general,

2 lower density, lower value freight is Class 50. Higher value,

3 less dense freight would be a higher class.

4 Q. Okay. Now, with respect to rating, do you have to call

5 somewhere internally to get a rate or do you have a book there

6 that you look at?

7 A. I call the rate department to get the rate.

8 Q. Now, we've been talking generally about how this works

9 when a shipper calls up and wants to move freight, described

10 two different ways. I'd like to now focus on what happened in
11 this case. And if you could describe specifically, these
12 details are important for the jury, what your first contact was
13 with Logistics Plus with respect to the shipment of the freight
14 which is the subject of this litigation?

15 A. I received a call from Mr. Chris Fanzini, who indicated
16 that he would like to get a freight rate.

17 Q. Let me slow it down. He called and asked for a freight
18 rate, what did he say in that telephone call?

19 A. He said, George, I would like to get a freight rate, I'm
20 looking to move freight from California to McKean,
21 Pennsylvania.

22 Q. What else did he say?

23 A. At that time, other than relating the information, that
24 was the gist of the conversation.

25 Q. He told you the origin, he told you the destination, did

1 he tell you the weight and dimensions?

2 A. He gave me the weight, I did ask the class, he did not
3 have the class. Therefore, I suggested a spot rate.

4 Q. Okay. Slow it down again one second here. You got the
5 origin, you got the destination, you asked for class weight, he
6 didn't know it?

7 A. That is correct.

8 Q. Did you go with a spot quote at that point because you
9 could get one without the class?

10 A. That is correct.

11 Q. After you hung up the phone with Mr. Fanzini, what did
12 you do with respect to this?

13 A. I telephoned the rate department, relayed the information
14 as it was given to me by Chris, to secure the rate. The rate
15 was given to me, I called Mr. Fanzini back and relayed what the
16 rate would be.

17 Q. From the time Mr. Fanzini called you to ask for the rate,
18 to the time you called him with the rate, what amount of time
19 transpired?

20 A. I would say 5, 10 minutes, tops.

21 Q. When you relayed the rate to Mr. Fanzini, what did he say
22 to you on the telephone on that call?

23 A. He basically thanked me for getting the rate, wasn't
24 quite sure how the rates stacked up to the competition, but he

25 would get back to me.

80

1 Q. What was the next communication you had with Mr. Fanzini
2 with respect to this shipment?

3 A. He called me back, and at that particular time he did
4 indicate that there was some doubts they could move the freight
5 at the level he was quoted, that he would like to get another
6 rate.

7 Q. All right. How long after that last call where you gave
8 him the rate, was the next call where he called up and asked
9 for a lower rate?

10 A. I would say somewhere between -- 45 minutes to an hour.

11 Q. This all happened the same day?

12 A. Oh, yeah.

13 Q. What specifically did you say to him when he said he
14 wanted a lower rate?

15 A. Again, I asked for more specifics as to the nature of the
16 freight. He was really unaware of what the freight was.

17 Q. What else did you say to him or ask him?

18 A. At that time if he knew what the class was.

19 Q. What did he specifically say to you?

20 A. That he was uncertain of the class, he would like me to
21 obtain a Class 50 rating.

22 Q. So did you do that?

23 A. I did that.

24 Q. All right. Now, with respect to what you do after he
25 told you to get a Class 50 rate?

81

1 A. Could you say that again, I'm sorry.

2 Q. After he told you could you get me a class 50 Rate, what
3 did you do?

4 A. I called the rate department, obtained a Class 50 rate,
5 called Chris back and relayed that information to him.

6 Q. Did you have any other communication with Mr. Fanzini
7 with respect to this transaction before the shipment was
8 actually moved?

9 A. Several days after he did call and the freight was
10 actually in transit.

11 Q. In transit -- I'm going back before it was in transit,
12 any other communication?

13 A. No.

14 Q. Did Mr. Fanzini ever call to tell you, you know, it's not

15 rate 50, it's rate 100?

16 A. No, sir.

17 Q. Or Class 100?

18 A. No, he did not.

19 Q. Physically, how does Chris Fanzini at Logistics Plus get

20 this freight moving, what does he do have to do, paperwork, for

21 instance?

22 A. I could not really speak to that, I'm not certain. But

23 the general action they would take is contact the shipper,

24 provide a bill of lading to the shipper and have the shipper

25 contact the carrier for pick up.

82

1 Q. Okay. So it is common that Logistics Plus, the freight

2 forwarder, prepares and provides the bill of lading, correct?

3 A. That's correct.

4 Q. I'm going to show you an exhibit to look at for a moment.

5 In your book, George, it's Exhibit CT-1, the exhibit is a

6 little blurry it was faxed a couple times, I apologize for how

7 it looks. George, on the top that says Logistics Plus,

8 correct?

9 A. That's correct.

10 Q. Is this Logistics Plus bill of lading?

11 A. That is a Logistics Plus bill of lading, that's correct.

12 Q. Did Logistics Plus prepare this bill of lading?

13 A. Yes, they did.

14 Q. Would that be Chris Fanzini who prepared the bill of

15 lading?

16 A. To the best of my knowledge.

17 Q. What class is provided on the bill of lading?

18 A. The bill of lading indicates Class 50.

19 Q. How is the freight described in there where it says

20 description and identification of articles?

21 A. The description crate. No further information provided.

22 Q. And a weight is provided, correct?

23 A. That's correct. It looks to be 5280.

24 Q. Now, is a Class 50 rate the absolute rock bottom rate a

25 trucking company can quote?

1 A. In general terms it would be, yes.

2 Q. The classifications, what do they go from, 50 to what?

3 A. Five hundred.

4 Q. When you quoted the rate the second time to Mr. Fanzini,

5 did you rely on the information provided by Mr. Fanzini, that

6 the freight was Class 50, in deciding whether or not Central

7 would enter into an agreement to ship that freight at that

8 rate?

9 A. I was simply providing a rate at the Class 50 rate, as he

10 asked me to do.

11 Q. Did you rely on Chris Fanzini's information to make that

12 decision?

13 A. Yes, I did.

14 Q. Did you have any reason at that time to believe that the

15 class provided by Mr. Fanzini was incorrect?

16 A. No reason to believe that.

17 Q. Was the crate, that we now today know was an X-ray

18 machine, properly classed at Class 50?

19 A. No, it was not.

20 Q. What class should it have been classed at?

21 A. The X-ray machine in question should have been rated at

22 Class 100.

23 Q. Had you known that the X-ray machine was a Class 100
24 piece of freight, would you have agreed to ship this freight
25 for the rate that you quoted?

84

1 A. We would never agree to haul freight at a class different
2 than what the actual freight is.

3 Q. Were you sitting here for the opening statement provided
4 by counsel for the plaintiff?

5 A. Yes, I was.

6 Q. In that opening testimony he testified or he didn't
7 testify, he expressed that testimony will be elicited from Mr.
8 Fanzini. And that Mr. Fanzini is going to say that he in fact
9 didn't tell you Class 50, but instead that you told him to move
10 this at Class 50 to get a lower rate; did you hear that?

11 A. I'm aware that he said that.

12 Q. That the attorney said that?

13 A. That's correct.

14 Q. Did that upset you when you heard that?

15 A. Sure, I was disappointed.

16 MR. DELANEY: I would object, your Honor, which

17 attorney is he talking about, I'm unclear?

18 MR. COHEN: During the opening, I believe -- either,
19 it doesn't matter, it's either attorney.

20 MR. DELANEY: You were suggesting that somebody
21 misrepresented something, I didn't speak about Mr. Fanzini at
22 all. If he's referring to me, I object.

23 THE COURT: I guess for my benefit because I didn't
24 hear -- now you want a clarification.

25 MR. KNOX: I will acknowledge, as merely a

85

1 representation, as to what Mr. Fanzini testified to.

2 THE COURT: Let's do this, let's roll the tape all
3 the way back and start forward again.

4 BY MR. COHEN:

5 Q. Sure. All right, we'll make sure it's clear where the
6 information is coming from. During Mr. Knox's opening, the
7 attorney for Logistics Plus, he indicated that testimony will
8 come from Mr. Fanzini in this trial that he didn't provide or
9 ask for a Class 50, but instead you told him to make it Class
10 50. After hearing that, did that upset you?

11 A. As I said, it's disappointing because the fact of the
12 matter is that he basically said I need a Class 50 rating
13 because he was unaware at that particular time to me he was
14 just quoting the freight, quoting a shipment.

15 Q. Let me ask you this just pointblank. Did you ever tell
16 Mr. Fanzini let's get it dumped down or reduce it to Class 50
17 because we could get you a lower freight rate?

18 A. No, I did not.

19 Q. Is your memory on this pretty clear?

20 A. Pretty clear, sure.

21 Q. Would you ever agree to misrepresent the classification
22 of freight so your company would make less money?

23 A. I would never agree to do that. I need to base my
24 decisions on what is being given, the information that is being
25 given to me.

1 Q. I'd like to talk and move into a different topic for a
2 moment. There's testimony that you were called at a certain
3 point after the delivery of the freight to go to Accu-Spec; did
4 you go to Accu-Spec to look at the freight?

5 A. Yes, I did.

6 Q. All right. Was that the day it was delivered?

7 A. It was the day it was delivered, I would say like

8 approximately a half-hour after delivery was made.

9 Q. Let me back up for a second as well. You've been doing

10 this 14 years, correct?

11 A. Yes, I have.

12 Q. How many times have you seen packaging of large freight

13 like this?

14 A. Many times over my career.

15 Q. And when you came and looked at that X-ray machine, what

16 you then found out was an X-ray machine in that crate, was the

17 crate opened?

18 A. They had some of the screws unscrewed, but the crate was

19 not opened.

20 Q. Did you ever have an opportunity to look at the crate

21 when it was opened?

22 A. I could visually see the machine slightly by peering

23 through the opening that they had made by loosening the screws.

24 Q. Was it enough to get a good idea what it looked like in

25 there?

1 A. Very limited.

2 Q. Based on your experience, looking at the crate from the
3 outside and what you could see from the inside, was this thing
4 packaged properly for a 5,280 pound machine?

5 A. Based on my experience, no.

6 Q. Explain to the jury, based on your experience, why you
7 think the two-ton machine was not packaged properly?

8 A. Well, it would be common practice in electronics and
9 electronic equipment, to have some kind of a foam padding or
10 specifically made custom foam packaging supporting the
11 electronics, the valuable parts of the machinery. As is done
12 with small packaging such as the case, obviously, in large
13 packaging.

14 Q. Are we talking about those corners, sometimes very hard
15 foam that you see on items --

16 A. Sure, injection foam. Possibly styrofoam pieces.

17 Obviously, some companies go a little beyond other companies.

18 But almost in all cases there's some steps taken to protect the
19 electronic material.

20 Q. Describe for the jury the difference between external

21 packaging and internal packaging?

22 A. External packaging would be the crate itself. The

23 structural integrity of the crate and allowing the crate or

24 whatever the package to be properly maneuvered and handled by a

25 forklift or a pallet jack. The inside packaging, again, would

88

1 be a piece of styrofoam or foam, air bags, any type of packing

2 that would keep heavy equipment from shifting around or fragile

3 equipment to sustain bouncing that occurs when they're heading

4 down the road.

5 Q. Okay. We're looking at Exhibit 13 again. In the case of

6 this very heavy machine, wouldn't it be reasonable, in fact,

7 required and prudent to have wood bracing supporting the upper

8 part of this very heavy machine from the outside walls?

9 A. That would definitely be expected that some sort of

10 packaging of that sort would be there.

11 Q. How about some wood beams protecting and holding in place

12 in the center of the crate the mid portion of this very heavy

13 machine?

14 A. That is a very common practice and was not apparent in

15 this particular shipment.

16 Q. You see this void here -- should that have been filled

17 with some sort of bracing, void filler material to keep the

18 product from moving?

19 A. With my experience, I would say certainly there should

20 have been some type of protective lining between the crate and

21 that piece of shelving.

22 Q. Was it unreasonable to have the flange of the shelf

23 pressed against the frame of that crate without protection to

24 keep it secured?

25 A. A machine of this nature and value, it is very uncommon.

89

1 Q. It's uncommon not to have that protection?

2 A. Uncommon not to have the protection there, that's

3 correct.

4 Q. This is Exhibit 9. This is the outside of the crate.

5 This machine weighed 5,280 pounds. Would it have been

6 reasonable or prudent to have a cross member on the crate in a

7 diagonal fashion to give additional rigidity?

8 A. Most crates of that size you would find that type of

9 protective packaging to protect the integrity of the crate.

10 And to keep the crate from wobbling in transit.

11 Q. Back to Exhibit 13. Based on your experience, have you

12 come to a conclusion as to the cause of the damage to the X-ray

13 machine in this crate by looking at the pictures and from your

14 personnel observations at the date you went to evaluate it?

15 A. My initial observation to me indicated that because of

16 the heaviness of the machine, that it slightly shifted in the

17 crate.

18 Q. Did it shift in the crate due to poor packaging?

19 A. Insufficient packaging and not being properly secured.

20 Q. With respect to this shipment, were you told that it was

21 used equipment?

22 A. No, sir.

23 Q. Did Logistics Plus ask you for a copy of the Central

24 Transport tariff?

25 A. No, sir, they did not.

1 Q. The bill of lading that I showed you earlier, the one

2 prepared by Logistics Plus, does that incorporate the carrier's

3 tariff?

4 A. The wording in their bill of lading does incorporate

5 Central Transport's tariff.

6 MR. COHEN: There is no way to read the language, it

7 will be done at a later time, your Honor, it's too blurry on

8 the copy.

9 BY MR. COHEN:

10 Q. And does the Central Transport tariff contain limitations

11 of liability?

12 A. Yes, it does.

13 Q. For used equipment is the limitation of liability 10

14 cents per pound?

15 A. It's not my area of expertise, but that is my

16 understanding.

17 MR. COHEN: Mr. Horetsky, thank you very much, I

18 have no further questions at this time.

19 THE COURT: All right, Mr. Knox.

20 CROSS-EXAMINATION

21 BY MR. KNOX:

22 Q. Good morning, Mr. Horetsky.

23 A. Good morning.

24 Q. Mr. Horetsky, you testified that you dealt with Mr.

25 Fanzini of Logistics Plus in pricing this shipment, correct?

91

1 A. That's correct.

2 Q. You stated that you were essentially giving a spot quote

3 for Logistics Plus, correct?

4 A. Initially, that's what we looked at was a spot rate,

5 that's correct.

6 Q. In making that quote, did Mr. Fanzini provide you with

7 all the necessary information?

8 A. For the spot rate the information required was provided,

9 that's correct.

10 Q. What is the other rate?

11 A. That is the class discounted rate.

12 Q. Did he give you the class for that rate?

13 A. On the second rate Class 50, yes, sir.

14 Q. What was the first rate, by the way?

15 A. I would -- venture a guess, a couple hundred dollars more

16 than the second rate. But --

17 Q. The second rate was \$590, I believe?

18 A. It may have been a little bit less than, \$525, somewhere
19 around there.

20 Q. So the difference isn't really that great?

21 A. Not significant in the big scheme of things.

22 Q. Did Mr. Fanzini ever specifically -- strike that.

23 Did you ever specifically ask Mr. Fanzini not what the class
24 was, but what exactly this freight was?

25 A. Yes, I did.

92

1 Q. Did he ever supply that to you?

2 A. He was unaware of what the freight was.

3 Q. If a third-party logistics carrier, like Logistics Plus,
4 for whatever reason does not give you that information, is that
5 a deal breaker, does that prevent you from entering into the
6 transaction?

7 A. We're trusting that the information that we received,
8 that they are knowledgeable of that. We are providing the rate
9 structure based on the information we are receiving.

10 Q. Sure. What if the information they give you is merely
11 one crate, one pallet, one skid, is that sufficient enough

12 information for you, as a carrier, to go forward with the
13 transaction?

14 A. Many times it is, yes.

15 Q. In fact, it's commonly done, I believe you stated in your
16 deposition that's commonly done when you're dealing with a
17 third-party logistics --

18 A. That's correct. A third party may call and say I have a
19 pallet and, you know, get into the specifics of what the item
20 is.

21 Q. I believe you testified that when you were talking to Mr.
22 Fanzini, he initially was uncertain of the class, is that
23 correct?

24 A. That's correct.

25 Q. And he asked you to get a Class 50 rate, is that your

1 testimony?

2 A. That's correct?

3 Q. And you gave it to him, correct?

4 A. Correct.

5 Q. You gave that to him even though he was uncertain of the

6 class?

7 A. That's correct. Again, I was providing the rate based on
8 the fact he was getting freight rates.

9 Q. And did you ultimately in fact agree to ship it at Class
10 50?

11 A. I provided a freight rate and really had no involvement
12 after providing the freight rate.

13 Q. Perhaps I should ask you, you did provide a freight rate
14 based on Class 50?

15 A. Based on the request for a Class 50 rate, that's correct.

16 Q. Did you ever do anything to confirm the fact this was
17 Class 50?

18 A. Well, again, we would base at time of pick up on the bill
19 of lading, making sure that any shipper or third party is
20 truthful with what's on the bill of lading or truly represents
21 what is actually being handled.

22 Q. Mr. Horetsky, are you familiar with a document labeled
23 OS&D manual?

24 THE COURT: OS what?

25 MR. KNOX: OS&D.

1 THE WITNESS: OS&D stands for over shortage and
2 damaged.

3 BY MR. KNOX:

4 Q. I want to put up on the screen here a document that was
5 produced in discovery by Central Transport marked CT-0080,
6 we'll mark it as Logistics Plus Exhibit 1. Mr. Horetsky, what
7 is that?

8 A. It looks like a cover sheet for a manual dealing with
9 over shortages and damages compiled by various members of our
10 home office.

11 Q. Is that a Central Transport document?

12 A. Appears to be, yes.

13 Q. Do you consult the OS&D manual in carrying out your
14 duties?

15 A. In sales my contact with that would be very limited, that
16 is more of an operational aspect.

17 Q. Have you ever looked at the OS&D?

18 A. Throughout my career I have looked at the OS&D manual,
19 that's correct.

20 THE COURT: Let me see counsel at side bar.

21 (At side bar on the record.)

22 THE COURT: I'm going to break, I thought about
23 having the jury start at about a quarter to one. How much
24 longer do you have with this guy?

25 MR. KNOX: Not much longer.

95

1 THE COURT: How about you?

2 MR. DELANEY: Fair amount.

3 THE COURT: We'll probably have to interrupt him to
4 get to this other guy.

5 (End of discussion at side bar.)

6 THE COURT: Members of the jury, we're going to take
7 a break now. I'm going to ask you to be back here at a quarter
8 to one. And we're going to get as far as we can with this
9 witness, then break for the guy who's coming in by video
10 conferencing, then we'll get this fellow back on. So we got a
11 lot going on. All right, we're in recess

12 (Luncheon recess from 11:52 a.m.; until 12:50 p.m.)

13 THE COURT: All right, you may continue, Mr. Knox.

14 (Continued) - CROSS-EXAMINATION

15 BY MR. KNOX:

16 Q. Good afternoon, Mr. Horetsky.

17 A. Good afternoon.

18 Q. Before the break I think we were talking a little bit

19 about common usages of terms like crate, skid that were used in

20 the industry. You acknowledged that is in fact commonly used,

21 I believe, is that correct?

22 A. That's correct.

23 Q. I believe I directed your attention to what is known as

24 the OS&D manual from Central Transport, Central Transport's

25 document. And you acknowledge that is a Central Transport

96

1 document, is that correct?

2 A. That's correct.

3 Q. If I could direct your attention to page CT0083, do you

4 see under paragraph 3-A there, can you see that?

5 A. Yes, I do.

6 Q. Would you agree that paragraph is saying that at some

7 point bundles should be called bundles, skids should be called

8 skids, drums, crates, racks, etc., do you see that?

9 A. Yes, I do.

10 Q. Would you agree with that -- that is in fact the policy
11 of Central Transport?

12 A. In regards to the shipper's responsibility to do that.

13 MR. KNOX: I'd like to move for the admission of
14 Logistics Plus Exhibit No. 1.

15 THE COURT: It's admitted.

16 BY MR. KNOX:

17 Q. And again on this point, Mr. Horetsky, do you have an
18 opinion as to whether or not such a description, one pallet or
19 one crate, is that sufficient information to give to the truck
20 driver when picking up that crate to know what in fact they're
21 getting?

22 A. Obviously, more information will be desirable.

23 Q. If a truck driver, such as the one in this case, Grminder
24 Shing from Central Transport goes to California, goes to the
25 Dage facility and sees that what he is picking up is one crate,

1 if the truck driver has a problem with that, at that point does
2 the truck driver say I'm not picking up this item of freight

3 because it's different than what's on the bill of lading?

4 A. I'm sure different drivers would react differently. I'm

5 not a driver, I really couldn't speak to that. There probably

6 are other people that would be better suited to answer that.

7 Q. Do you know if it's Central Transport's policy if a truck

8 driver confronts a piece of freight and all it says is one

9 crate, that truck driver is then supposed to call somebody and

10 say hey, what is this, what's in this crate?

11 A. As to the specific policy of what they're instructed to

12 do, I cannot speak to that. I would think that we would want

13 to get as much information as possible. What they would

14 actually do in this situation I'm not sure what the protocol

15 would be.

16 Q. Well, whatever the policy may be, the truck driver in

17 this case did in fact pick up the freight?

18 A. He did pick up the freight.

19 Q. He signed the bill of lading saying one crate, correct?

20 A. That's correct.

21 Q. Mr. Horetsky, the use of class designations on shipments,

22 don't you agree that whether something is Class 50 or Class

23 100, that these really correspond to weight and density in

24 terms of factoring in price?

25 A. It would also correlate to liability issues.

98

1 Q. What do you mean by that?

2 A. Well, class of freight, also, is a derivative of the
3 density of the freight. But also the value of the freight. So
4 a lower class freight would be dense, generally low value
5 material. Or higher class rate freight would be less density
6 freight, but also other higher value freight. That would be
7 reflected in the liability that we take on when we accept that
8 freight at the time of pick up.

9 Q. Is that always the case, when something is Class 100,
10 does that always mean it's more valuable than Class 85, Class
11 50?

12 A. I'm not an expert in that area, I would say generally
13 higher class is more expensive. But, again, I'm not an expert
14 in that area, so I couldn't speak to that for sure.

15 Q. Do these class designations tell anybody anything else
16 about the freight?

17 A. Just the basic characteristic of the freight, nothing in
18 detail as to what the freight is or what might be moved.

19 Q. Does Class 50 or Class 100 communicate to a truck driver
20 or a forklift driver or anybody that this is freight that is
21 fragile or susceptible to breaking very easily?

22 A. A generally higher class freight will be a little more
23 susceptible. But as a carrier, we're looking to handle any
24 piece of freight in a proper fashion.

25 Q. But does Class 100, does that specifically say to a truck

99

1 driver or a forklift driver, this is a fragile item and needs
2 to be handled with care?

3 A. In and of itself, no, it does not.

4 Q. Are you aware, Mr. Horetsky, that generally there is an
5 allegation by Accu-Spec in this case that Logistics Plus
6 misclassified the freight?

7 A. Just through the testimony.

8 Q. You are generally aware of that, though, is that correct?

9 A. Yes.

10 Q. Do you think that this freight was in fact misclassified?

11 A. Knowing what the crate is at this point, I would say yes,
12 it was misclassified.

13 Q. In order to classify something, would you agree you

14 obviously need to know what it is?

15 A. I would agree with that statement, yes.

16 Q. If somebody just told you it's a crate, does that hamper

17 anyone's ability to classify the freight?

18 A. Certainly.

19 Q. Let's assume for the sake of argument that this was

20 misclassified, it should have been Class 100 versus Class 50.

21 Even if that is the case, does that misclassification play any

22 large role in causing damage to this freight?

23 A. No. As I stated earlier, as a carrier, we would want to

24 be responsible for any piece of freight, regardless of the

25 class and handle it in a proper fashion.

100

1 Q. But the misclassification, that doesn't play any role in

2 damage, is that correct?

3 A. In mishandling or damage the freight, no.

4 Q. Mr. Horetsky, is it your testimony that there were

5 definitely two quotes given here to Mr. Fanzini?

6 A. Yes.

7 Q. An initial spot quote, I believe your testimony was that

8 it was few hundred dollars or so more --

9 A. My best recollection would be a couple hundred dollars

10 more than the Class 50 rate.

11 Q. But then there was another quote, another rate given,

12 correct?

13 A. That's correct.

14 Q. Did you get the sense in your conversations with Mr.

15 Fanzini that Accu-Spec, they simply wanted a better deal than

16 the first quote?

17 A. Sure.

18 THE COURT: Mr. Knox, let's cut this off, this call

19 should be coming in. Do you want to step down, Mr. Horetsky.

20 THE WITNESS: Sure.

21 MR. KNOX: For whatever it's worth, your Honor, I

22 have maybe five or ten minutes at the most left.

23 THE COURT: All right. Members of the jury, let me

24 just tell you that, if this was going to be deposition

25 testimony I would tell you the same thing. The mere fact this

1 is coming in by way of video conferencing, you should not treat
2 it any differently than any other kind of testimony, as if you
3 saw the person seated right up here on the stand. The only
4 difference is one is coming over TV, the other witnesses you
5 are, of course, seeing live. When the call comes in, let us
6 know.

7 (Recess from 1:03 p.m.; until 1:07 p.m.)

8 MR. DELANEY: Mr. Fisher, can you hear me?

9 THE WITNESS: Yeah.

10 MR. DELANEY: I think either the judge or one of his
11 staff persons is going to swear you in.

12 THE COURT: I'll do it right now. Raise your right
13 hand.

14 JOSEPH FISHER, PLAINTIFF'S WITNESS, SWORN

15 (Testifying by Video Conference)

16 DIRECT EXAMINATION

17 BY MR. DELANEY:

18 Q. Mr. Fisher, we have a limited window of time, so I'm
19 going to try to be quick. Will you tell us your name, your
20 address and your occupation?

21 A. My name is Joseph Fisher, my address is 857 Sistiview

22 Lane in Manteca, California. And my position at Dage is I'm

23 the service manager for North America, South America.

24 Q. How long have you been employed by Dage?

25 A. Almost 10 years.

102

1 Q. And where is Dage headquartered?

2 A. In Aylesbury, England.

3 Q. And what is the business of Dage?

4 A. We manufacture X-ray inspection equipment and bond test

5 equipment, which is used in the semiconductor and particle

6 circuit board industry.

7 Q. We have heard reference to a piece of X-ray equipment

8 that was bought by Accu-Spec Electronic Services, Inc., of

9 McKean, Erie County, Pennsylvania, in this case. And that the

10 equipment was shipped from Fremont, California, in February of

11 2003. Does Dage have a facility in Fremont, California?

12 A. Yeah, we have a sales and service division in Fremont,

13 California, which covers North America and South America.

14 Q. Were you involved at all in the sale and/or the shipment

15 or preparing for shipment of the Dage model XL6500 X-ray unit

16 that was purchased by Accu-Spec Electronic Services, Inc.?

17 A. Yes.

18 Q. Do you know what the history of this machine was prior to

19 its sale to Accu-Spec?

20 A. Yes.

21 Q. And can you tell us what that was -- do you know how old

22 the machine was?

23 A. The machine shipped from England in September of 2002,

24 shipped directly to Rosemont, Illinois, for a trade show. It

25 was at a trade show for three days, and then it was shipped to

103

1 our Fremont, California facility, and it was set up in our demo

2 room from the time it arrived, which is probably sometime in

3 September, until it shipped out to Accu-Spec in February of

4 '03.

5 Q. All right. During the course of the machine being at the

6 Rosemont, Illinois trade show, do you know if the machine was

7 put in operation at all?

8 A. Yes, it was set up. We did some demonstrations on it

9 over the course of the show, which is three days long.

10 Q. And while it was at the facility in Fremont, California,
11 was the machine available to demonstrate its use to potential
12 customers?

13 A. Yes.

14 Q. Do you know is there an actual record kept of the amount
15 of use of the machine from the time it's shipped from England
16 until it's sent to Accu-Spec in February of 2003?

17 A. There is a counter on the machine itself for the hours --
18 but there is no record other than that.

19 Q. Do you know what the amount of use was prior to its
20 shipment in February of 2003?

21 A. I don't have an exact number, I can give you an estimated
22 number.

23 Q. Would you give us that estimate, please?

24 A. I would say probably had no more than 20 hours, X-ray
25 hours on it.

1 Q. A machine like this, do you have an understanding of what
2 its anticipated or expected life would be?

3 A. I would anticipate this machine could be used for

4 decades.

5 Q. In terms of useful hours or hours of use, do you have any
6 estimate of what that would be expected, hours of use?

7 A. Typically, our customers would use it about 600 hours a
8 year. You can multiply that by 20 years or 30 years or
9 whatever.

10 Q. All right. Was it typical in 2002 and 2003 for your
11 facility in Fremont, California, to have a machine available,
12 an X-ray machine available on site?

13 A. Yes.

14 Q. Would those machines periodically be shipped to other
15 locations in the United States in order to attend trade shows?

16 A. Yes.

17 Q. Were you the person who would oversee or were you the
18 person who would assign people to undertake the shipping of
19 these various X-ray machines around the country?

20 A. Yes.

21 Q. All right. In 2003 when this particular unit was shipped
22 to Accu-Spec, were you involved in any way in preparing for the
23 shipment?

24 A. Yes, I wasn't in the office the day it was shipped, but I
25 did give the technician an overview of what he needed to do to

1 prepare it for shipment.

2 Q. When these machines come in from the United Kingdom, how
3 are they contained or how are they shipped?

4 A. It's in a wooden crate, the machine is placed on the base
5 of the crate, and then there's wood blocks all the way around
6 the perimeter of the base of the machine, which is used to
7 secure it so it doesn't move in shipment. And then we
8 basically just put the sides on and put the top on -- and all
9 of the sides are held together by lag bolts or carriage bolts.

10 Q. Are there movable parts when this equipment is in place
11 and in operation, are there movable parts to it?

12 A. There shouldn't be, no. Everything is secured down for
13 shipment. We have shipping brackets that we will connect to
14 the machine to keep everything from moving in shipment.

15 Q. Well, my question was once it's out of the crate and it's
16 in Accu-Spec's plant, are there movable parts to the equipment
17 then?

18 A. Yes.

19 Q. And my question was going to be how do you secure those

20 movable parts for shipment purposes?

21 A. Yeah, we have metal brackets that we use to secure all of

22 the movable stages to the frame of the machine.

23 Q. Okay. Now, you say that you were not present on the day

24 that this piece of equipment was shipped from Fremont,

25 California?

106

1 A. No.

2 Q. Did you assign someone to oversee the shipping?

3 A. Yes.

4 Q. And do you remember the name of that person or have you

5 investigated the name of that person?

6 A. I believe the person was Hoi Tren at that particular

7 time.

8 Q. Was he a Dage employee?

9 A. Yes.

10 Q. Were there any other employees of Dage that you're aware

11 of who witnessed the crating and shipping of this particular

12 machine?

13 A. Nobody witnessed the actual crating of it, other than the

14 technician. Our receptionist did observe the system being
15 loaded on the truck. She was out there when it was being
16 loaded on the truck.

17 Q. The crate that was used to ship this piece of equipment
18 from California to Pennsylvania, was it a new crate or was it a
19 crate that was used to ship from England to Illinois to
20 California?

21 A. The same crate that the machine originally came in from
22 England.

23 Q. All right. After this piece of equipment was shipped on
24 February 5, 2003, did you speak with the technician who
25 witnessed the crating and the loading of this equipment onto a

107

1 truck?

2 A. Yes.

3 Q. If there had been damage in the process of crating or
4 loading onto the truck, what would have been the responsibility
5 of that technician in terms of reporting?

6 A. He would have gave me a damage report and at that point
7 we would have -- if the person that loaded the machine had

8 damaged it, we would have tried to get reimbursement cost of it
9 from that company. But there was no damage report that was
10 filed.

11 MR. COHEN: Your Honor, I object as to the
12 hypothetical --

13 THE COURT: I'm sorry?

14 MR. COHEN: My first objection is based on the
15 question is a hypothetical.

16 THE COURT: It's overruled. What was the second
17 objection?

18 MR. COHEN: The second basis was that it elicits
19 hearsay.

20 THE COURT: Overruled.

21 BY MR. DELANEY:

22 Q. When you interviewed the technician, did the technician
23 provide any report of damage for the shipment --

24 A. No.

25 THE COURT: Wait until he finishes his question.

2 BY MR. DELANEY:

3 Q. When you interviewed the technician, Mr. Fisher,
4 following the shipment of February 5, 2003 to Accu-Spec, did
5 you receive any report from the technician verbally that there
6 had been any incident damaging the equipment?

7 A. No.

8 Q. Did you receive any report, written report from the
9 technician indicating that there had been any damage to the
10 equipment in crating or loading the equipment onto the truck on
11 February 5, 2003?

12 A. No.

13 Q. Did you speak with the receptionist who witnessed the
14 loading of the crate onto the truck?

15 A. Yes.

16 Q. Did she report any incident of damage or observation of
17 damage in the loading of the equipment onto the truck on
18 February 5, 2003?

19 MR. COHEN: Objection, hearsay.

20 THE COURT: Let me see you at side bar.

21 (At side bar on the record.)

22 MR. COHEN: Your Honor, the objection is hearsay.

23 MR. KNOX: I would join in that objection.

24 THE COURT: Why isn't it hearsay?

25 MR. DELANEY: The rules of evidence talk about in

109

1 the absence of a report, something other than hearsay.

2 THE COURT: It's an exception?

3 MR. DELANEY: It actually talks about the business

4 rule. I think this is a business records exception. There is

5 a section that speaks to the absence of whether, demonstrating

6 the absence of an event. I can grab the short memo I got on

7 that.

8 THE COURT: Must be 803 something, right?

9 MR. DELANEY: I believe it is. Essentially, what

10 he's testifying to is this would be a report given by

11 employees --

12 THE COURT: Are you saying that by virtue of custom

13 or practice or allegedly referring to an item of writing or

14 oral?

15 MR. DELANEY: Yes, sir.

16 THE COURT: It's overruled.

17 (End of discussion at side bar.)

18 BY MR. DELANEY:

19 Q. Mr. Fisher, can you hear me?

20 A. Yeah.

21 Q. My last question was did the receptionist provide you a

22 verbal report of the occurrence of any damage to the crate or

23 equipment when it was shipped on February 5, 2003?

24 A. No.

25 Q. Did she provide you with any written report of damage to

110

1 the crate or the equipment when it was shipped on February 5,

2 2003?

3 A. No.

4 Q. Mr. Fisher, the exterior of this piece of equipment, what

5 material is it made of?

6 A. The exterior of the machine itself or the crate?

7 Q. The machine itself?

8 A. It's some type of steel, stainless steel.

9 Q. And behind that steel is there another material, a

10 shield?

11 A. Yeah, there's lead shielding.

12 Q. We've seen an exchange of e-mails that you had with Mr.

13 Mullen. When this equipment arrived at Accu-Spec on February

14 5, 2003, did you view some digital photographs of the condition

15 of the machine that day?

16 A. Yes.

17 Q. Did you make a recommendation about whether or not

18 Accu-Spec should power up the machine or not?

19 A. Yes, I actually told them they should not power up the

20 machine due to safety hazards associated with the X-rays.

21 Q. Does Dage have a facility in the United States where the

22 type of damage you observed could have been repaired?

23 A. No.

24 Q. Lastly, this crating that is used to ship this machine,

25 is there any possibility of the machine shifting in the crate

111

1 during transport?

2 MR. COHEN: Objection, foundation.

3 THE COURT: Sustained. Lay the foundation.

4 BY MR. DELANEY:

5 Q. Let me ask you, Mr. Fisher. How many of these types of
6 machines have you shipped, either from the Fremont, California
7 facility, either to trade shows or customers?

8 A. Probably about a hundred.

9 Q. Have you overseen in more than a few cases the crating of
10 the machines?

11 A. Yes.

12 Q. Do you understand how they're crated?

13 A. Yes.

14 Q. Have you physically been involved in crating the
15 machines?

16 A. Numerous times.

17 Q. Is it possible that a machine could shift inside the
18 crate and cause some damage to the machine?

19 A. Only if it was dropped.

20 MR. DELANEY: That's all the questions I have, Mr.
21 Fisher, there will be a couple other people who will ask
22 questions of you.

23 THE COURT: All right, Mr. Cohen.

24 MR. COHEN: Thank you, your Honor.

25 CROSS-EXAMINATION

1 BY MR. COHEN:

2 Q. Mr. Fisher, thank you for making yourself available.

3 A. No problem.

4 Q. My name is Jeff Cohen, I represent Central Transport

5 International. Did you hear what I said, sir?

6 A. Yeah.

7 Q. You testified earlier about the model that was sold to

8 Accu-Spec as having been used at a trade show, is that correct?

9 A. Yes.

10 Q. And you said that it was manufactured in September of

11 2002, correct?

12 A. Yes.

13 Q. And it was only sold to Accu-Spec five months later. In

14 that five months, was most of its time spent sitting on the

15 floor at the demo room in California?

16 A. Yes.

17 Q. And how do you know that it only went to one trade show?

18 A. Because I'm involved in all of the trade shows. I go to

19 the trade shows to do the demonstrations on the machine.

20 Q. I see in your Web site you have trade shows in

21 Switzerland, Norway, France, Philadelphia, Chicago, all over

22 the world really; is it possible that this machine may have

23 been shipped to other trade shows as well?

24 A. No.

25 Q. Okay. And are other machines shipped around to different

113

1 trade shows?

2 A. Yeah, our office here is responsible for North America

3 and South America. If there was a trade show over in

4 Switzerland, that machine would come from a different office.

5 Q. But Chicago or Philadelphia, then you handle that one,

6 right?

7 A. Yes.

8 Q. Okay. So in that five-month period, you're saying that

9 there was only one trade show in North America or South

10 America?

11 A. Yes.

12 Q. All right. Now, you said that the machine had 20 hours

13 of use. How many X-rays has it made?

14 A. How many hours of X-rays?

15 Q. No, actually I'm trying to figure out, if you can, how

16 many X-rays do you make in 20 hours?

17 A. I'm not sure you can actually count the number of X-rays.

18 Q. It is more than like one an hour?

19 A. Well, it's realtime X-rays. So once you turn the machine

20 on, it scatters X-rays all inside the machine constantly.

21 Q. Once it's on, it's constantly X-raying?

22 A. Yeah, once you turn the X-rays on, yes.

23 Q. How do you get a sampling there, do you have to open the

24 door and then close the door or open the door put it in, then

25 close the door?

114

1 A. Yes, there's a loading door on the front of the machine.

2 Q. When you open the door, you got to turn it off, is that

3 right?

4 A. Yes.

5 Q. All right. So it was turned on and off, I guess, for

6 different X-rays, do you know how many times?

7 A. Well, the machine itself would always be on. You would

8 just turn the X-rays off, just to clarify that.

9 Q. So the 20 hours is just X-ray hours?

10 A. X-ray hours, yes.

11 Q. Otherwise, it was just on the whole time?

12 A. Yes.

13 Q. So it would have been hundreds of hours that it was on,

14 correct?

15 A. Yeah.

16 Q. At night is it on?

17 A. Yes.

18 Q. Twenty-four hours a day it's on?

19 A. Twenty-four hours a day, yes.

20 Q. So you testified that there were about -- a normal one of

21 these use about 600 hours per year, correct?

22 A. X-ray on hours.

23 Q. X-ray on hours. Fifty hours a month about, I guess,

24 correct?

25 A. Yeah.

1 Q. So if this thing was X-raying for 20 hours, it would have

2 been like as if it was in full use for, well, less than two

3 weeks, correct?

4 A. Yes.

5 Q. Originally, my understanding is that Accu-Spec priced a

6 new one to come from the manufacturing facility in England, the

7 price was \$135,000, is that correct?

8 A. I can't be positive but that sounds about right.

9 Q. And it's also testimony by the Accu-Spec representative

10 here that they got the demo model for \$120,000, is that

11 consistent with your understanding?

12 A. Yes, that's correct.

13 Q. And the reason they got the \$15,000 discount is because

14 they didn't buy the new model, they bought the used model, is

15 that fair to say?

16 A. Yes.

17 Q. With respect to the shipping of this X-ray machine, you

18 said it originally comes from the United Kingdom, correct?

19 A. Yes.

20 Q. And it's put in this box which is built around it, right?

21 A. Yes.

22 Q. And is it fair to say, I guess you already testified that

23 it moves around in the same box from place to place?

24 A. Yes.

25 Q. At a certain point does the box get tossed out and

116

1 because of wear and tear on the box?

2 A. Not normally. Normally by the time we sell the demo

3 unit, the crate goes with the demo unit. And then we just get

4 a new machine in a new crate.

5 Q. Okay. If it goes to ten trade shows or five trade shows,

6 the box moves five times?

7 A. Yes.

8 Q. The machine, as packaged, Dage chose not to put bracing

9 at the top of the machine, correct, internal?

10 A. Yes.

11 Q. Dage chose not to put bracing at the mid point of the

12 machine, is that correct?

13 A. Yes.

14 Q. Do you know what a tip and tell device is?

15 A. Yes.

16 Q. What is a tip and tell device?

17 A. A tip and tell device is a device you put on the outside

18 of a crate and if the machine is tipped, there's little blue

19 beads that will go on to the top section indicating that it had

20 been tipped.

21 Q. And I guess they stay there so when it comes to the

22 destination, you can tell it was tipped?

23 A. Well, yeah, it should be on the crate.

24 Q. If a tip and tell indicator wasn't activated, if it

25 didn't show -- if the tip and tell indicator was not activated,

117

1 that would show the crate didn't tip, obviously, is that right?

2 A. Yes.

3 Q. Also, Dage chooses not to use any hard core foam, like

4 when you get a TV set, the hard foam packing around the corners

5 internally, is that correct, they choose not to do that?

6 A. Yes.

7 Q. And on the outside structure of the crate, Dage chooses

8 not to put diagonal pieces of wood for additional structural

9 stability, isn't that correct?

10 A. Yes.

11 Q. With respect to the movement of the crate within the box,

12 it's, of course, possible that the freight being transported on

13 a truck or otherwise could shift within the box because of the

14 nature of transportation, is that fair to say?

15 A. No.

16 Q. And you say that it can't shift because you brace it at

17 the bottom?

18 A. Yes.

19 Q. And you did not witness the packaging of this particular

20 machine, is that correct?

21 A. No.

22 Q. Do you know if the braces to keep the stages from moving

23 were installed personally?

24 A. When the crate came back from the trade show, when I

25 unpacked it, all of the braces were intact.

118

1 Q. Right, when it went from your facility to Accu-Spec,

2 since you weren't there, you don't know if those braces were

3 installed, correct?

4 A. No, I don't.

5 MR. COHEN: Thank you, very much, Mr. Fisher, for

6 your time.

7 THE COURT: All right, Mr. Knox.

8 MR. KNOX: Very briefly.

9 CROSS-EXAMINATION

10 BY MR. KNOX:

11 Q. Mr. Fisher, good afternoon, my name is John Knox and I

12 represent Logistics Plus in this matter, you may remember me

13 from the deposition. I just have one item, I want to talk to

14 you about --

15 THE COURT: Let's go right to it.

16 BY MR. KNOX:

17 Q. Mr. Fisher, isn't it true that Dage places a printed out

18 letter folded up and taped on the outside of the crate which

19 says you must use a 10,000 pound forklift when unloading it?

20 A. Yes.

21 Q. Why does Dage place this letter on the outside of a

22 crate?

23 A. Once the system is loaded into the truck for shipment, we

24 have no control over the movement of the machine at that point.

25 And the machine weighs approximately 5,000 pounds, but because

1 of the weight distribution, you cannot use a 5,000 pound
2 forklift to lift it. You have to use a 7,500 pound or above,
3 that's the reason we put it there, to make everybody aware of
4 the fact that you must use a big forklift to pick the machine
5 up.

6 Q. I saw you talking about that at your deposition, is it
7 fair to say that this letter, that is taped on the outside of
8 the crate, is intended for truck drivers and forklift drivers?

9 A. Yeah.

10 Q. Lastly, does this letter at all mention what's inside the
11 crate is in fact an X-ray machine, an industrial X-ray machine?

12 A. No.

13 Q. What does the letter say?

14 A. I can't remember, but paraphrasing it says something to
15 sort of you must use a 10,000 pound forklift when picking up
16 this crate.

17 Q. In looking at the damage photos in this case, do you have
18 an opinion as to whether perhaps an underrated 5,000 pound
19 forklift was used in this case as opposed to 10,000?

20 MR. COHEN: Objection, your Honor, foundation.

21 THE COURT: Sustained. Don't answer that.

22 BY MR. KNOX:

23 Q. Mr. Fisher, have you had any experience in dealing with
24 episodes where you have personal knowledge of seeing an
25 underrated forklift machine drop an X-ray machine of this

120

1 weight?

2 A. Yes.

3 Q. Based on that experience, is that the basis for your
4 opinion as to whether or not a forklift machine was used
5 properly here?

6 MR. COHEN: Objection.

7 THE COURT: It's speculative, sustained.

8 MR. KNOX: I have nothing further, thank you.

9 MR. DELANEY: That's all, your Honor. Thank you,
10 Mr. Fisher.

11 THE COURT: Thank you very much, we're going to turn
12 off the TV now. Members of the jury, as I said, I've got a
13 criminal sentencing I've got to do. We'll be in recess, we'll
14 get back to you as soon as we can.

15 (Jury Trial was in recess from 1:36 p.m.; until

16 2:25 p.m.)

17 THE COURT: Mr. Delaney.

18 MR. DELANEY: I think we are resting, I know that we
19 are resting, your Honor. I need to make sure I moved the
20 admission for Plaintiff's Exhibits 1 through 25. And there is
21 another exhibit entitled Defendant's Exhibit CT-5, which is the
22 e-mail, I would move its admission as well.

23 THE COURT: Any objection to any of that?

24 MR. KNOX: No objection.

25 MR. COHEN: No objection.

121

1 THE COURT: All right, then those are admitted.

2 MR. DELANEY: Thank you, your Honor.

3 THE COURT: All right. On to the defendant's case.

4 MR. DELANEY: I think we had Mr. Horetsky on the
5 stand, I think Mr. Knox still had some questions.

6 MR. KNOX: That's correct, I just have a few more
7 questions.

8 THE COURT: Good enough. Mr. Horetsky if you could
9 get back on the stand.

10 (Continued) - CROSS-EXAMINATION

11 BY MR. KNOX:

12 Q. Very briefly, Mr. Horetsky. After Central Transport

13 picked up the freight in California, who had possession of the

14 freight from California to Pennsylvania?

15 A. The freight would been in our possession when we moved it

16 through our system.

17 Q. Who handled the freight during this period of time?

18 A. That would have been dock handlers within Central

19 Transport --

20 Q. Are those contractors or agents of Central Transport?

21 A. I couldn't speak to the specifics, but Central has

22 employees and contract workers.

23 Q. Mr. Horetsky, did you personally inspect the crate after

24 the damage was discovered?

25 A. After receiving a call to basically requesting me to go

122

1 take a look, I did go down to Accu-Spec and take a look at the

2 crate.

3 Q. And is it your testimony that you believe that the

4 machine had shifted in the crate after looking at it?

5 A. Based on my experience, it appeared that the machine had

6 somehow shifted in the crate that it was originally packaged

7 in.

8 Q. Did you reach an opinion as to whether you thought it was

9 packed correctly based on your inspection?

10 A. I wasn't really there to make that determination, but

11 just a quick visual inspection, based on my experience, seemed

12 to be insufficient packaging, yes.

13 Q. And when you inspected the crate, did you notice symbols

14 on the outside of the crate, namely a wine glass?

15 A. I could not say at the time I was there that I noticed

16 any markings on the crate.

17 Q. Looking at that picture, which again is Exhibit 9,

18 Plaintiff's Exhibit 9, do you see those wine symbols?

19 A. I do see those symbols, yes.

20 Q. Do you know what those symbols mean?

21 A. Typically, a wine glass would indicate fragile or glass.

22 And the umbrella would indicate to stay dry.

23 Q. Do you know who those symbols are intended for, are those

24 for the truck drivers?

25 A. I would say the symbols would be involved, would be on

123

1 there for anyone that would move the freight, anytime from
2 beginning to end, or even sitting on the dock at the shipper's
3 location or when it's received, just to indicate if it's
4 sitting on the dock, there is some indication of what
5 precautions might need to be taken.

6 Q. Thank you, just one last point. If Logistics Plus here
7 on behalf of Accu-Spec tried to negotiate the best deal
8 possible, the lowest rate possible for this shipment, if it's a
9 really low rate, does that benefit Central Transport in any
10 way, does it benefit the bottom line if it's a lower rate
11 versus a higher rate?

12 A. We're a for profit company, it would not benefit us.

13 Q. Would it benefit Logistics Plus?

14 A. I couldn't speak to that, but I would think not.

15 Q. If it's a lower rate, isn't it true that really the
16 person who benefits here is Accu-Spec?

17 A. The ultimate person responsible for freight charges,
18 sure.

19 MR. KNOX: Thank you, I have nothing further.

20 CROSS-EXAMINATION

21 BY MR. DELANEY:

22 Q. Mr. Horetsky, I'm Patrick Delaney and I represent

23 Accu-Spec. I want to ask you a little bit about rates just so

24 I have an understanding of them. Before I do that, let me ask

25 you this. Prior to learning of damage to this equipment and

124

1 crate on February 14, 2003, did you have any direct contact

2 with anyone from Accu-Spec about this shipment?

3 A. Prior to that, no, sir.

4 Q. You were the salesperson who was responsible for

5 receiving the order from Logistics for this freight?

6 A. I was the person who answered the phone when the rate

7 quote was requested.

8 Q. Did you have any other dealings about this freight

9 between February 5th and February 14th of 2003?

10 A. None whatsoever.

11 Q. You've explained to us that there are different rates,

12 one of which is rate 50, and another is rate 100, is that

13 correct?

14 A. That would relate to classes of freight. Class 100,

15 Class 50.

16 Q. When we use the term rate, are we talking about price?

17 A. Rate is the price, that's correct.

18 Q. So we should talk about class. There is a Class 50, is

19 that correct?

20 A. There's a Class 50 through Class 500.

21 Q. Have you determined that this should have been some class

22 other than 50, this freight?

23 A. Did I determine that?

24 Q. Yes.

25 A. Never prior, only after seeing the material or seeing the

125

1 machine.

2 Q. That's what I mean, you're coming here today and saying

3 to the jury this was the wrong class, is that what your

4 testimony is?

5 A. Based on the machine that was shipped in the crate, the

6 class as indicated on the bill of lading would not have been

7 correct.

8 Q. And that class rating, your testimony is that class

9 rating was given to you by someone from Logistics Plus?

10 A. The request for the class rate was given to me, that's

11 correct.

12 Q. Does that mean that they asked for that rate, that price,

13 but they didn't really try to say to you this is a Class 50

14 product?

15 A. For the purpose of quoting, which we get a lot of

16 customers will call and ask for quotes. They'll specify

17 classes and we, based on that class, would provide a freight

18 rate.

19 Q. So when Mr. Fanzini said to you can you get me a Class 50

20 rate, what he meant was give me a low price, is that your

21 understanding?

22 A. What he meant was give me the Class 50 rate and that's

23 what I did.

24 Q. But he wasn't representing to you that it was a product

25 that should be classified as Class 50?

1 A. There was no indication as to what the product was or if

2 he even knew what the product was, there was no discussion as

3 to that.

4 Q. But you agreed to give him a Class 50 price, correct?

5 A. That's correct. Any customer that calls up and they

6 indicate the class, we're relying on the fact that's what

7 you're asking us. They're asking for a Class 50 rate, that's

8 what we give them. They asked for a Class 100, we're assuming

9 that they are knowledgeable of what the class is, we're

10 providing that rate to them.

11 Q. But you didn't take it that day, you didn't take Mr.

12 Fanzini's comment to mean this is a product that falls within

13 Class 50, you just knew he wanted a price that would be equal

14 to a Class 50, isn't that correct?

15 A. That's correct. I didn't know if it was a Class 50 or if

16 it wasn't.

17 Q. Now, is there any rule that says that you cannot respond

18 to a customer and insist that you know what the freight is?

19 A. There's not a rule of that nature.

20 Q. So you could have essentially said to, and I hope I'm

21 pronouncing his name correctly, Mr. Fanzini, that I'm not going

22 to give you any price until you tell me what the product is?

23 A. You could do that to make sure they know exactly what the
24 class is.

25 Q. Now, if you decide to give a price at Class 50, does that

127

1 mean that Central Transport will transport the freight
2 differently than if you gave a rate 100 or, I'm sorry, Class
3 100 rate?

4 A. As I indicated earlier, we're going to handle all the
5 shipments with care.

6 Q. So your answer is there is no difference in the manner in
7 which you will handle the freight, whether it's Class 50 or
8 Class 100?

9 A. I'm not actually handling the freight, but I would say it
10 is going to be handled in a professional manner.

11 THE COURT: Hang on a second, listen to the
12 question.

13 THE WITNESS: Yes, sir.

14 BY MR. DELANEY:

15 Q. Will Central Transport handle the freight in the same
16 fashion if it's Class 50 or Class 100?

17 A. Yes, we will.

18 Q. The class designation does not change the care with which

19 the trucking company is supposed to handle the freight, isn't

20 that correct?

21 A. That's correct. It will effect the liability issues

22 associated with that.

23 Q. Now, there's been a lot of testimony, I guess from you on

24 direct, that nobody told us what the equipment was, is that

25 correct?

128

1 A. That's correct.

2 Q. Do you know if the gentleman from Logistics told you it

3 was equipment?

4 A. There was no discussion as to what it was.

5 Q. But when the trucker gets to the Fremont, California

6 location, he sees a wine glass or should see a wine glass on

7 the crate, what does the wine glass tell the trucker?

8 A. An indication on the carton would be that there could be

9 some glass or some fragile product in the crate.

10 Q. Do the dock workers know that, too, what the wine glass

11 means?

12 A. I'm not a dock worker, I couldn't speak to that.

13 Q. Well, is it commonly known in your experience throughout

14 the work force of Central Transport what the wine glass means?

15 A. Yes.

16 Q. And what the umbrella means?

17 A. Sure.

18 Q. If a Central Transport trucker shows up at a pick up

19 location and finds a crate that is damaged that he is supposed,

20 he or she is supposed to load on the truck, what is that

21 trucker going to do?

22 A. I would say that he would probably call dispatch.

23 Q. Is it generally understood among Central Transport's

24 workers that they're not to take possession of a damaged piece

25 of freight or a damaged crate until they have some

129

1 authorization from --

2 A. It would be common sense that we would not accept

3 visually damaged freight.

4 Q. Now, is there any procedure for making notations on bills

5 of lading with regard to damage?

6 A. If there is visual damage that can be noted, it could be

7 noted. More likely, we would not take the shipment.

8 Q. Let me show you what we previously marked as Plaintiff's

9 Exhibit No. 25. First off, let me give you the whole picture

10 of it. Then I'm going to bring it in a bit, ask you if you've

11 ever seen this particular document before?

12 A. I have, yes.

13 Q. Is this the bill of lading that was delivered to the

14 Central Transport trucker in Fremont, California on February 5,

15 2003?

16 A. This is the bill of lading tendered to the driver at the

17 time of pick up, that's correct.

18 Q. Is there any notation on the bill of lading about damage

19 to either the crate or the equipment?

20 A. No, no notation.

21 Q. It's a clean bill of lading, that what it's referred to

22 in the industry, isn't it?

23 A. It is.

24 Q. Okay. Let me show you another document that we put into

25 evidence, this is Exhibit 22, let me just hand this to you.

1 It's a letter, it's already been identified as a letter from
2 Central Transport denying Accu-Spec's claim for damage to this
3 equipment. Have you ever seen it before?

4 A. Yes, I have.

5 Q. And what does the first sentence of that letter say?

6 A. We have conducted an investigation of your claim and have
7 found no liability on our part.

8 Q. And who is it signed by?

9 A. Jeffrey Cackowski, claims manager.

10 Q. Where is Mr. Cackowski's office?

11 A. That would be our home office in Warren, Michigan.

12 Q. He is coming to trial to testify?

13 A. Yes, he is.

14 Q. All right. Do you know what investigation he performed?

15 A. That is his position and his job, I couldn't speak to
16 that.

17 Q. Did he call you?

18 A. I do not recall if he directly called me in regards to
19 this.

20 Q. When you went to the Accu-Spec property on February 14,

21 2003, did you meet with Mr. Mullen?

22 A. Briefly, yes.

23 Q. And did you view the crate?

24 A. Yes, I did.

25 Q. Was the crate damaged?

131

1 A. There appeared to be minor crate damage, yes.

2 Q. You saw the photographs?

3 A. Yes, I did.

4 Q. Was the damage you observed consistent with those

5 photographs?

6 A. As it relates to the crate, yes. With the internal, I

7 did not visually see that because it wasn't completely

8 uncrated, there were no sides off the crate.

9 Q. Did Mr. Mullen tell you that the damage to the crate was

10 in existence as the crate came off the Central Transport truck?

11 MR. COHEN: Objection, hearsay.

12 THE COURT: Overruled.

13 THE WITNESS: The situation that was told to me was

14 there was damage to the crate noticed sometime between getting

15 it off and on the ground.

16 BY MR. DELANEY:

17 Q. I'm sorry, who's the gentleman that wrote the denial --

18 A. Jeff Cackowski.

19 Q. Let me finish the question.

20 THE COURT: You're jumping in to fast, see that guy

21 there, he can only get one of you down at a time, so don't jump

22 in on his question. Go ahead.

23 BY MR. DELANEY:

24 Q. What was the name of the gentleman again who made the

25 denial?

132

1 A. Jeffrey Cackowski.

2 Q. If Mr. Cackowski had called you up before writing that

3 denial, would you have told Mr. Cackowski I went to Accu-Spec,

4 I saw damage to the crate, they told me the damage was there as

5 it was unloaded, would you have told him that?

6 A. If I was called by him and he requested that, sure.

7 Q. But you weren't called?

8 A. No, we did have an inspection made of the material.

9 Q. Did you look at the inspection of the equipment that was
10 done by Central Transport's contractor?

11 A. Through this litigation, yes.

12 Q. You didn't direct that that inspection be done, did you?

13 A. Indirectly, yes.

14 Q. Okay. Do you know the name of the firm that performed
15 the inspection?

16 A. MTI Inspection Services.

17 Q. Let me show you what's been previously marked as
18 Defendant's Exhibit CT-9 and ask you if that document appears
19 familiar?

20 A. Yes, it does.

21 Q. Is that a report of MTI, the inspectors who looked at
22 this equipment in Erie?

23 A. Yes, sir, it is.

24 Q. Can you read what they say about the damage?

25 A. "One Dage XL6500 Accu-Spec X-ray machine punctured. The

1 right corner of the case is dented, the operator shelf is

2 pushed into the case. The shelf is bent. The button center is
3 bent and loose. The left corner of the shelf is scraped. The
4 unit is sitting on an angle inside the crate. The left side is
5 bent. The unit has shifted from its base and has punctured the
6 floor of the unit."

7 Q. Did that report come to you from MTI?

8 A. No, sir.

9 Q. By the way, what is the date of the report, just so we
10 have the context?

11 A. Date inspected 2/19/03.

12 Q. So it's before the denial of Accu-Spec's claim by the
13 gentleman from Central Transport?

14 A. It is.

15 Q. Okay. Let me show you what is Plaintiff's Exhibit No.

16 15, were you able to visualize this portion of the X-ray
17 machine when you visited Accu-Spec's property on February 14,
18 2003?

19 A. Very, very limited visual of that part of the machine.

20 Q. Do you dispute that this is a piece of equipment that is
21 encased, it's outer shell, is that of steel?

22 A. Stainless steel.

23 Q. Did you dispute that immediately inside the steel is a

24 lead lining?

25 A. I would not be able to speak to that, I don't know.

134

1 Q. Do you dispute that that photograph shows that the force

2 supplied to this piece of equipment essentially distorted that

3 steel shelf?

4 A. The shelf was distorted, yes.

5 Q. And is it your position that had some sort of foam

6 packing been used at the corner that that kind of damage

7 wouldn't have happened?

8 A. I'm not an expert, I would say it's very possible that

9 that type of damage could have been prevented, yes.

10 Q. By foam packing?

11 A. Proper packaging, yes.

12 Q. By foam?

13 A. Yes, sir.

14 Q. And by some diagonal strip on the crate, you're

15 suggesting that that kind of damage could have been prevented

16 by a diagonal member across the crate?

17 A. With proper packaging throughout the crate, yes, sir.

18 MR. DELANEY: Thank you. Those are all the
19 questions I have, your Honor.

20 THE COURT: All right, anything further of this
21 witness?

22 MR. COHEN: Yes, your Honor, just a couple.

23 REDIRECT EXAMINATION

24 BY MR. COHEN:

25 Q. Let's talk about packaging for a second. You've

135

1 testified with regards to packaging both on direct and on
2 cross-examination. With respect to internal packaging, if a
3 2-by-4 was placed here and at the top and also placed across
4 the other sides locking this machine into its position within
5 the crate, do you think that would have prevented this damage?

6 A. I think it would have been much more likely that no
7 damage would have occurred.

8 Q. When you talk about foam packaging, are you talking about
9 those plastic peanuts that you see in boxes that you get from
10 UPS?

11 A. No, I'm specifically speaking to foam mold that people in

12 this industry, similar to if you buy a television set or an air
13 conditioner, you would have custom foam in the carton where you
14 can almost pick that box up and shake it and there is no threat
15 of anything moving within the box. And Central, essentially, a
16 crate, something similar and commonly is packed that way in the
17 industry.

18 Q. I'd like to shift to the responsibilities of a driver.
19 Is it fair to say that there are many employees of Central
20 Transport and the jobs are diversified?

21 A. That's correct.

22 Q. For instance, you don't drive trucks, right?

23 A. I do not.

24 Q. People in the accounting department don't do sales,
25 correct?

136

1 A. That's correct?

2 Q. Similarly, the truck drivers drive the trucks, correct?

3 A. That's what they do, yes.

4 Q. Are they certified to drive trucks?

5 A. Yes, they are.

6 Q. When they go to a shipper or an origin location, when
7 they pick up freight, can you describe to the jury what
8 paperwork they get when they go to that shipper?

9 A. Typical procedure would be for a driver to get a bill of
10 lading, they would receive a copy of the bill of lading and
11 leave a copy of the bill of lading with the shipper. Would
12 indicate the day and time, normally the driver's name, when
13 they picked up the shipment.

14 Q. The driver doesn't come to the location with the bill of
15 lading in his hand, correct?

16 A. No, he does not.

17 Q. Once the driver gets the bill of lading, is it my
18 understanding he looks at the description, if it says crate, he
19 looks around for a crate, is that right?

20 A. That's correct.

21 Q. So his job is pretty much to verify the piece count and
22 that physically it's generally what it describes, is that fair
23 to say?

24 A. To the best of his ability, yes.

25 Q. Is he charged with opening up crates and boxes?

1 A. In no way, no.

2 Q. Are drivers trained in the complexities of rate

3 structures?

4 A. As you indicated, they drive the truck, that's basically

5 what they do.

6 Q. You were questioned about whether or not Central

7 Transport would have handled the freight differently if it

8 would have had a different classification on it, for instance,

9 if it was 100 instead of 50, you said no, correct?

10 A. That's correct.

11 Q. Before we get to that, if the freight, if Central knew

12 the freight was misclassified, is it fair to say they never

13 would have entered into the contract for the rate provided?

14 MR. DELANEY: Objection, leading, your Honor.

15 THE COURT: Sustained.

16 BY MR. COHEN:

17 Q. Although the rate may be different or although if the

18 class is different, is the rate different?

19 A. Yes, it is.

20 MR. COHEN: Thank you very much, Mr. Horetsky.

21 THE COURT: Anything further of this gentleman?

22 MR. KNOX: Nothing further.

23 THE COURT: Thank you sir, you're excused. Mr.

24 Cohen, you may call your next witness.

25 MR. COHEN: Your Honor, thank you. At this time

138

1 Central Transport calls Jeffrey Cackowski.

2 THE COURT: All right. Mr. Cackowski, would you
3 please spell your name for my court reporter?

4 THE WITNESS: It's C-a-c-k-o-w-s-k-i.

5 JEFFREY CACKOWSKI, CENTRAL TRANSPORT WITNESS, SWORN

6 DIRECT EXAMINATION

7 BY MR. COHEN:

8 Q. Mr. Cackowski, good afternoon.

9 A. Good afternoon.

10 Q. Could you please describe for the jury -- well, first
11 state your name and your business address for the record?

12 A. Jeffrey Cackowski, 12225 Stephens Road, Warren, Michigan.

13 Q. And who are you employed by?

14 A. Central Transport International.

15 Q. What is your job title?

16 A. Claims manager.

17 Q. If you could describe for the jury members what your job

18 history has been, well, before Central Transport started?

19 A. Before Central Transport, I started with Central

20 Transport out of college, prior to that I did do an internship

21 with the U.S. government, in supply. Since then I've been

22 employed by Central Transport, started out as a rate clerk.

23 Shortly after that I became a junior claims analyst, senior

24 claims analyst, claims prevention manager in the operational

25 area, and currently a claims manager.

139

1 Q. Okay. Very briefly, since you had a long chain of

2 movement there, if you could describe your job responsibilities

3 along the way?

4 A. As a rate clerk, years ago before the computer

5 technology, as we have it now, although we had some, didn't

6 have as much as then, involved with rating freight bills and

7 processing payments. Discrepancies in payment. Then a junior

8 claim analyst, started to learn claims, what claims are about,

9 claims law. And working with lower dollar claims. Then got

10 into the senior claims analyst, got into higher dollar claims.

11 More corporately involved with bigger accounts, we're automated

12 based for GM, Chrysler deals. As a claim prevention manager,

13 claims prevention in our operations department works with

14 preventing claims so there are claims to process. Establishing

15 procedures and policies in order to perfect claims. From there

16 claims manager, running the claims department.

17 Q. That's where you are now?

18 A. That's where I'm at.

19 Q. Are you familiar with this dispute?

20 A. Yes, I am.

21 Q. What I'd like to first talk about is you're familiarity

22 with documents that are used in the transportation of freight

23 is somewhat a little confusing. First, describe to the jury,

24 if you will, what a bill of lading is?

25 A. A bill of lading is basically a contract of carriage.

1 It's a contract between the shipper and the carrier to

2 transport goods from point A to point B. I don't know if we

3 need any more detail than that.

4 Q. I think that generally does answer the question.

5 Generally, does the shipper prepare a bill of lading?

6 A. Generally, a shipper has a bill of lading prepared at the

7 time of pick up by the driver.

8 Q. Okay. Now, when the freight is transported pursuant to

9 the bill of lading, does the bill of lading, well, I'll use the

10 word incorporate other documents with rules regarding the

11 transportation of freight?

12 A. The bill of lading, as you see, is basically a short

13 form. A long form on the back of it, there are, basically, I

14 think 12 rules and regulations that gives a stipulation test

15 regarding the handling of freight. From that there are other

16 tariffs that the applicant in regards to the National Motor

17 Freight Classification or other carrier tariffs that are

18 applicable to the movement of the freight.

19 Q. This document has been faxed on multiple occasions, but

20 has small print on the top of the document, which I'm going to

21 attempt to read. For your Honor's information and for counsel,

22 this is the bill of lading found at Exhibit 13, which is also

23 Logistics Plus bill of lading which from my evaluation has the

24 same language as the document marked CT-1. So CT-13 is

25 Logistics bill of lading with the same language as CT-1,

141

1 however, you can read it on this copy. So I'm going to read

2 it.

3 THE COURT: Which one again is this?

4 MR. COHEN: Yes, your Honor. CT-13, it's in a book

5 that was provided, I do have an additional copy for your Honor

6 if you do not have one.

7 THE COURT: Go ahead.

8 MR. COHEN: I'll do my best to blow this up, this is

9 the actual bill of lading, but I do not expect to truly be able

10 to read this that well, if at all. Because of the difficulty

11 in this copy.

12 THE COURT: Do you have it where you can just read

13 it?

14 MR. COHEN: I'm going to do that right now, your

15 Honor.

16 BY MR. COHEN:

17 Q. On the top of the bill of lading there is information --

18 this is the bill of lading prepared by Logistics Plus?

19 A. This is the bill of lading prepared by Logistics Plus,

20 yes.

21 Q. It says on the top straight bill of lading short form,

22 original, not negotiable. Received. That's all in capital

23 letters. Subject to classifications and tariffs in effect on

24 the date of the issue of this bill of lading. Let me stop

25 there. Does Central Transport have what's called a tariff?

142

1 A. We have the rules tariff CTI-100 is our rules tariff

2 which establishes different rules and in conjunction the

3 movement of any freight as tendered to us.

4 Q. When you say CTI-100, it's Central Transport

5 International, Inc. 100?

6 A. Correct.

7 Q. It's an abbreviation, correct?

8 A. Right.

9 Q. Further on in this paragraph, it says, essentially, that

10 the applicable motor carrier classification or tariff shall

11 apply. And that's further down in the first paragraph. Is

12 there a motor carrier classification or tariff that you're

13 talking about when you say CTI-100?

14 A. Well, there's the National Motor Freight Classification,

15 trying to cover, also try to cover any other carrier tariffs

16 that are applicable.

17 Q. We have I think a total of about three documents that

18 were done here, okay. I'm going make it make it as simple as

19 possible. The first one is a bill of lading, correct?

20 A. Correct.

21 Q. And then the next one I'd like to talk about to the jury

22 is the CTI-100, basically, Central Transport's tariff, correct?

23 A. Rules tariff.

24 Q. I'm going to show you an exhibit, actually, you have the

25 exhibit in front of you, it is marked as Exhibit 3, Central

143

1 Transport 3. And I'll put the face page of this exhibit on the

2 monitor for the jury to look at, you can get an idea. Okay.

3 Looking at CT-3, is this the Central Transport International

4 100-C rules tariff?

5 A. Yes, this is the cover page.

6 Q. It's actually says on there "applies only when reference

7 is made hereto." Did the bill of lading reference this
8 document?

9 A. The bill of lading specifically references it on the pick
10 up sticker down on the bottom of the bill of lading.

11 Q. And in addition to that, does it also reference the
12 carrier tariff in the paragraph I read earlier?

13 A. Well, yes, a general paragraph, Logistics Plus on their
14 bill of lading carrier's tariff.

15 Q. Let me show you that particular sticker so we know what
16 we're talking about here. This is the Logistics Plus bill of
17 lading, you mentioned the sticker and this is something that
18 I'm going to blow up right there; is that the sticker you're
19 talking about?

20 A. Correct, it incorporates the National Motor Freight
21 Classification.

22 THE COURT: You're way too fast and you're way too
23 low. You're a big man, pull the mike in, speak into it.

24 THE WITNESS: Okay.

25 MR. COHEN: We're going to slow down.

1 THE COURT: We are going to slow down. Let's go.

2 BY MR. COHEN:

3 Q. The sticker, it says subject to MNFC-100/CTII-100, stop

4 there for a moment. CTII-100, this tariff?

5 A. Yes, it is.

6 Q. This is the thing that says NMFC, what does that stand

7 for?

8 A. National Motor Freight Classification.

9 Q. We're going to get to that. Let's talk about the

10 sticker. Who puts the sticker on the bill of lading?

11 A. Our driver at the time of pick up.

12 Q. This person here, correct?

13 A. Correct.

14 Q. It is indicating the name of the driver. Okay. Now,

15 within this document the Central Transport tariff, what is this

16 document, generally?

17 A. The tariff incorporates numerous rules and regulations

18 for handling freight with Central Transport. Could be rules

19 for inside delivery charges, there's numerous rules. Our

20 liability of limitations of course are in there. Which are

21 important in this matter.

22 Q. Did you say limitation of liability are included in this

23 document?

24 A. Yes, they are.

25 Q. I'd like you to turn in Exhibit 3 to page CT0159, that is

145

1 denoted in the bottom right-hand side, stamped number. Please

2 tell me, sir, when you come to that page?

3 A. I have.

4 Q. This section is called governing publications, what does

5 this say with respect to the use and incorporation of the

6 National Motor Freight Classification?

7 A. It indicates that the National Motor Freight

8 Classification is the governing tariff within the CTII-100

9 tariff.

10 Q. So to get it all laid out, we have the bill of lading, we

11 have the Central Transport tariff, and now we have the National

12 Motor Freight Classification tariff, correct?

13 A. Correct.

14 Q. Together, do all of these documents govern the

15 transportation of this freight?

16 A. Yes.

17 Q. I'd like you to turn the page where the number on the

18 bottom right-hand side is CT0237. Where you have that, please

19 tell me and I'll ask a question.

20 A. Okay, I have it.

21 Q. What's the process by which this rule book, Central

22 Transport rule book, updated?

23 A. At this time there were addendums or revisions attached

24 to the rear of the tariff.

25 Q. And this shipment moved in 2002, correct?

146

1 A. I believe it was February of 2003.

2 Q. Sorry, February of 2003. Was this the most recent --

3 well, let me ask this. Is this tariff broken up into item

4 numbers?

5 A. Yes.

6 Q. And what does the item number mean?

7 A. Well, it's just a chronological numbering system for

8 reference, I guess. Different topics are covered under

9 different items.

10 Q. What is the topic of this item number 579?

11 A. Item 579 deals with used articles or commodities.

12 Q. Was this the version of item 579 which was in effect at

13 the time the transportation occurred in this case?

14 A. Yes.

15 Q. I'm going to read a section to you and ask you a

16 question. It says "shipments of used articles or commodities

17 will not be accepted by the carrier unless the shipper releases

18 the value to not exceed 10 cents per pound per package or

19 declares a higher value and agrees to pay an additional

20 charge." In this case did the shipper declare a value of the

21 freight on the bill of lading?

22 A. No, they did not.

23 Q. Did the shipper agree to pay an additional charge?

24 A. No, they did not.

25 Q. Next section, this says number one. "If shipper desires

147

1 to tender," what does that mean, to give?

2 A. Correct.

3 Q. "A shipment with a value in excess of 10 cents per pound,

4 the shipper must indicate the released value on the bill of

5 lading. Carrier will assess an additional charge of 26 cents

6 per each of \$100 or fraction thereof, declared by the shipper

7 in excess of 10 cents per pound." Was there any additional

8 charge or additional value in the case?

9 A. No, there was not.

10 Q. The next section says "if a shipment is inadvertently

11 accepted without the declaration of released value, it will be

12 considered to have been released to a value not exceeding 10

13 cents per pound per package, and charges assessed on that

14 basis. Carrier's liability will be 10 cents per pound per

15 package. A corrected bill of lading will not be accepted to

16 change the released value once the shipment has been accepted

17 by the carrier." In this case, well, why does Central

18 Transport have this item in its tariff?

19 A. For protection against used articles. Used articles have

20 an inherent nature of problems in regards to damage. And we

21 had as a carrier experienced numerous debates of our liability

22 without prior to having this item, in regards to what the

23 carrier liability is for the damaged used article.

24 Q. Now, this item has two options, is that correct?

25 A. Yes, it does.

1 Q. You can either release it at 10 cents per pound by not
2 putting a value or you could declare the value and pay more
3 money, is that correct?

4 A. Correct.

5 Q. In this case there's been testimony by the Dage employee
6 that the machine was discounted because it was used, the demo
7 machine was discounted because it was used. Would this tariff
8 item apply to the machine in this case?

9 A. Most definitely.

10 Q. Now, I'd like to move onto the next document you
11 mentioned and I'm going to --

12 THE COURT: Mr. Cohen, you can presently. Members
13 of the jury, we're going to take a short break.

14 (Recess from 3:10 p.m.; until 3:25 p.m.)

15 THE COURT: All right, sir, would you resume the
16 stand.

17 BY MR. COHEN:

18 Q. Before we broke we were talking about the Central
19 Transport's tariff. Before we get into the National Motor

20 Freight Classification, I hope everyone can stay awake for all
21 this, it's tough. But the question I have for you is why does
22 a trucking company need a tariff, would basically a trucking
23 company be able to survive without a tariff?
24 A. Well, history shows that no, they can't. Protection is
25 needed in regards to -- limits of liability. The motor

149

1 carrier, the motor carriers were the last ones basically to put
2 these into effect. You have the air industry, you have the
3 rail industry, you have the OSHA industry that all have
4 limitation of liability. We carry trucks that average 40,000
5 pounds on them. We may have a thousand trucks running a night.
6 We need to have some type of knowledge of limitation of what we
7 have. So it's for protection.

8 Q. Does a trucking company work on a very small margin, is
9 that one of the reasons protection is needed?

10 A. Right. All a truck company, basically a good company
11 runs anywhere from 98 to maybe 97 percent operating ratio.
12 Meaning that it takes 98 percent revenue dollars to operate.
13 Two percent profit. It's a small profit margin.

14 Q. You said the acronym LTL, what does LTL mean?

15 A. LTL, I'll try to talk slower, less than a truck load.

16 Versus a truck load carrier where a truck load carrier picks up

17 a truck load of freight and delivers it to the destination. A

18 less than truck load carrier consolidates shipments at

19 different break points throughout the country.

20 Q. The next item that we discussed which I'd like to talk

21 about now is this thing called the National Motor Freight

22 Classification. And correct me if I'm wrong, that document is

23 incorporated into the carrier tariff, correct?

24 A. Correct.

25 Q. I'm holding a book that's a couple three-inches thick, it

150

1 says in the face National Motor Freight Classification.

2 Actually says your name on it, do you know what this is?

3 A. Yes.

4 Q. What is it?

5 A. It's the National Motor Freight Classification. It

6 basically has every commodity that you can think of. From this

7 table to this monitor or this microphone. In a different

8 classification rating on it for transportation purposes.

9 Q. Let me ask you a couple questions because there is

10 different terminology moving around. One question I have is

11 there is something called an item number and something called a

12 classification number, correct?

13 A. Correct.

14 Q. First I'm putting on the exhibit monitor for the jury and

15 I'll ask you a couple questions about that. It's Exhibit

16 No. 4 in Central Transport's exhibits. All right. On the

17 left-hand side of this there is a column that says item. Do

18 you see that?

19 A. Yes.

20 Q. What does the item number mean?

21 A. The item number corresponds with a particular commodity.

22 So each commodity has an item number as a reference.

23 Q. On this page we have at the top vacuum tubes and they're

24 classed and the number for that is 63470, is that right?

25 A. Correct.

1 Q. Now, on the other side of the page on the right side of

2 the page of Exhibit CT-4, there is a column called class. What
3 is the class?

4 A. The class that we talked about a little bit today, there
5 are classes ranging from Class 50 to Class 500. The lower the
6 class, for each associated class, there will be the rates that
7 goes with that to move the commodity. The lower the class, the
8 lower the rate to move the commodity. The higher the class,
9 the higher the rate.

10 Q. Now, this page has a subheading electrical equipment. Is
11 it your testimony that this is just everything out there from
12 chemicals to food to game toys, iron and steel, is all in this
13 book, it's got a number out there?

14 A. Correct.

15 Q. On this particular page, we happen to have the print out
16 for our case, X-ray machines. Do you see that?

17 A. Yes, I do?

18 Q. X-ray machines are given class numbers, is that correct?

19 A. Yes, they are.

20 Q. And the classification numbers, is it correct that the
21 classification numbers for X-ray machines are based on value in
22 part?

23 A. Well, in part this particular item number does have a

24 breakdown based on the value of the article.

25 Q. The first one under this X-ray item number 63560, sub

152

1 one, says actual value not exceeding \$30 per pound, and

2 identified as Class 100. Do you see that?

3 A. Yes, I do.

4 Q. And this X-ray machine, per the testimony, is valued at

5 \$120,000. Would Class 100 be an accurate characterization of

6 the X-ray machine which is the subject of this litigation?

7 A. Based on weight and value that we have now in front of

8 us, yes.

9 Q. The freight bill indicates Class 50, is it your testimony

10 that this freight was misclassified?

11 A. Without a doubt.

12 Q. What components go into the determination of how

13 something gets its class number?

14 A. There's a committee that determines the value, determines

15 the class for a commodity. And they took numerous things into

16 consideration. One is density. One being stability, which is

17 how it's stackable, size wise and so forth. Value is a

18 consideration. There's numerous factors that they use.

19 Q. I'm going to show you the second page of CT-4, it is a

20 document which is from the National Motor Freight Traffic

21 Association, let me ask you this. Is the National Freight

22 Motor Freight Traffic Association a group that puts together

23 the National Motor Freight Classification?

24 A. It gets all too complicated. But this is the group, I'm

25 not sure of their exact names or not, there is a committee that

153

1 makes classification, when a new item comes out, say a new TV

2 is on the market, it's a plasma TV. It's the committee that

3 comes down together to determine what the proper class is for a

4 plasma TV. It's this committee here that is involved with

5 that.

6 Q. Now, there is a chart, it's called the National

7 Classification Committee Value Guidelines. And on this chart

8 it lists the class and the maximum average value per pound. Do

9 you see that?

10 A. Yes, I do.

11 Q. For Class 50 items, it lists the maximum average value of

12 99 cents a pound, do you see that?

13 A. Yes, I do.

14 Q. And for Class 100 items, it lists maximum average value

15 of \$24.39 cents per pound, do you see that?

16 A. Yes I do.

17 Q. Now, is this the basis, is this one of the bases that

18 Central Transport charges higher rate, freight rates for higher

19 class goods?

20 A. You could say that, but that's kind of an indirect,

21 that's an indirect correlation, I would say. You know the

22 class is based on what the rate is going to be. If this is a

23 factor in determining the class, then yes, you have all the way

24 down the line correspond those two together.

25 Q. Okay. So just to make it clear, I don't want it to be

154

1 unclear, it's confusing enough as it is, just to make sure

2 we're clear. The rate is based on class, correct?

3 A. The rate is based on class.

4 Q. Does the National Motor Freight Classification also have

5 a section on specifications for packaging crates?

6 A. Yes, in front of the National Motor Freight

7 Classification, I didn't really get a chance to explain it.

8 There are other rules stated in front. In the back there's

9 some package concerns and so forth. There's all kinds of

10 information. But to answer your question, there is a specific

11 item in regards to the specifications for shipping crates.

12 Q. I'm showing you on the screen, can you see that?

13 A. Yes.

14 Q. Item 245 of the National Motor Freight Classification,

15 has definition or specifications for crates, are you familiar

16 with this provision?

17 A. Yes, I am.

18 Q. Could you explain to the jury what this is?

19 A. Well, classification or how the crate should properly be

20 constructed for safe transportation. There's different

21 guidelines that are placed in there that take into

22 consideration what the crate is going to take into effect

23 during motor carrier transportation. This is not -- anything

24 it's for motor carrier. And there are certain specifications

25 that are spelled out in this item number.

1 Q. Could you describe, I'm glad you raised this point,
2 describe for the jury what in the normal transportation by a
3 motor carrier, what stresses must the package be designed to
4 withstand to be in the back of a tractor-trailer?

5 A. Well, there are a lot of forces that are apparent, I
6 don't know if everybody has ever road in the back of a pickup
7 truck or the back of a semi. We do that for some training for
8 some of the dock men. Trailers are subjected to heavy bounces
9 and very big movement. It's different in the rear of the
10 trailer or the front of the trailer or the mid of the trailer.
11 Because those forces, packaging must be of certain
12 specification. There are specifications in here of ever type
13 of package, when in a carton, you can ship it in a --- in a
14 drum. There's boxes, there's all kinds of specifications that
15 have to be met for motor carrier transportation.

16 Q. Okay. And in this case we're dealing with crates, so we
17 look at item 245. There are six items that are listed with
18 respect to crating. Did you see the pictures of the crate?

19 A. Yes, I did.

20 Q. Did you hear the testimony about the crate?

21 A. Yes, I have.

22 Q. Let me ask you this. How long have you been handling

23 freight claims issues?

24 A. About 20 years.

25 Q. How many times in 20 years have you seen damage to crates

156

1 similar to size and weight of the crate which is the subject of

2 this litigation?

3 A. I've seen many, many damages. Many that are severe in

4 regards to the transportation movement. So I've seen many.

5 Q. Based on your experience and after reading the item 245

6 and looking at the pictures and hearing the testimony, have you

7 come to a conclusion as to whether or not the crate used in

8 this case was or the freight in this case was packaged properly

9 for transportation in the back of the tractor-trailer?

10 A. There are some obvious lacking factors that can be

11 pointed out just by looking and reading this and looking at the

12 pictures. So, in short, the unit could have been protected a

13 whole lot better than it was.

14 Q. I'm going to show you a couple pictures first, and then

15 I'm going to ask you about the packing condition. If you could
16 describe, based on your experience, what internal packaging and
17 bracing means from your perspective?

18 A. Well, it's simple. Nobody has really pointed out that in
19 this picture that is very demonstrative of what the problems
20 are. The tray is left rested right against the wall of the
21 crate. And it looks like what happened during movement is it
22 just kept bouncing and bouncing and bending. There was nothing
23 to hold the crate, that the unit is inside the crate itself.
24 The construction of the crate, to be honest with you, I've seen
25 much worse. I've seen much worse. It didn't fit all the

157

1 specifications of the National Motor Freight Classification,
2 but it could have been a lot worse. The problem here and I
3 think why this is apparent from the notation made at the time
4 of pick up, the time of delivery is because the outside of the
5 crate didn't look that bad. The problem was inside the crate.
6 And there was nothing there to protect the unit from moving
7 around during all that vibration. This moved from California
8 to Pennsylvania. It didn't go from Erie to Allentown. It went

9 across country, through a lot of roads.

10 Q. Are some of the things that could have been done would be

11 wood bracing within the cabinet, as well as foam cabinet within

12 the cabinet?

13 MR. DELANEY: Objection, leading.

14 THE COURT: It is leading, sustained.

15 BY MR. COHEN:

16 Q. How would you describe what internal measures should have

17 been taken?

18 A. There should be some type of protection to keep it from

19 moving. There are statements indicating that the unit was

20 squared in down at the bottom. We have to remember this crate

21 was reused two or three times. So those nailing and renailing

22 the bottom and unbolting would have made that all that much

23 more susceptible to the movement. Any type of protection on

24 the top, if this tray wasn't here, really would be beneficial.

25 The tray should probably be disassembled from the unit and the

1 crate could have been smaller and contained. But with that

2 tray there, it allowed the top of the unit probably to bounce

3 around and bend during transportation. The tray should have
4 been, I think instead of the interior package, if the tray
5 would have been taken off the crate would have been a smaller,
6 there would have been no room for it to move. With that tray
7 there it just was a disaster waiting to happen.

8 Q. Let's switch gears again on everybody here. There was
9 testimony regarding this exhibit, Central Transport 7, can you
10 look at it, Mr. Cackowski, this is the original copy in front
11 of you in the book, it's number seven. Did you write this
12 letter?

13 A. Yes, I did.

14 Q. It says "we have conducted an investigation of your claim
15 and have found no liability on our part." What investigation
16 was conducted?

17 A. When a claim comes into our office in Warren, Michigan,
18 we evaluate all the documents associated with the shipping. In
19 this case the bill of lading would have been reviewed with the
20 delivery -- and reviewed. Inspection report and any pictures.
21 Along with any internal documents that may have been associated
22 with the movement of the freight during our handling.

23 Q. It says "we hold a clear delivery receipt with no

24 notation of any discrepancy at time of delivery. We also have

25 no record of any discrepancy with this shipment while in our

159

1 possession." Let's go over the standard operating procedure

2 for the dock workers at Central Transport. If there is damage

3 to freight on its journey from California to Pennsylvania, is

4 it standard operating procedure and practice and habit of the

5 Central Transportation employees to note that damage and send

6 it in to your department for a claim file?

7 A. Yes. If there's damage within the system, it's to the

8 dock man's best interest to notate the damage. If he doesn't,

9 if somebody else handles it after him and indicates it's

10 damaged, he would be responsible for this, reprimanded if need

11 be.

12 Q. In your claim file did you have any notation of damage in

13 route?

14 A. We did not.

15 Q. And the delivery receipt was signed by the receiver of

16 the freight clean?

17 A. Correct.

18 Q. Did you have an inspector go out?

19 A. Yeah, apparently after delivery, George, of course, was

20 called and he went out to the delivery site. And typically if

21 there's a discrepancy, either note at the time of delivery or

22 at times if there is something after delivery. Requests

23 inspection, we will have an inspection be performed to protect

24 our interests and to document the situation as it is at that

25 point in time.

160

1 Q. Showing you the inspection report for a second. Have you

2 seen, I'm blowing it up here, if you look at Exhibit CT-9 in

3 the book, it's the whole thing, is there an inspection report

4 which was generated at the request of Central Transport?

5 A. Yes, it is.

6 Q. It says in the circle part here on the screen "tip and

7 tell not activated." We've heard a little bit about the tip

8 and tell, why don't you tell us what the tip and tell is about?

9 A. A tip and tell is basically that, and there are different

10 forms of them. They indicate typically it's by an indicator or

11 something that when the unit has been tipped to a certain

12 degree, there will be ink that will stay to that degree. And

13 it's basically a tip or teller. Kind of tells what transpired

14 with the shipping container at the time of transit. It's

15 normally used in transportation.

16 Q. This inspection report says tip and tell not activated.

17 What does that tell you about whether it tipped?

18 A. Well, I guess that would indicate that it did not tip

19 during transportation.

20 Q. Based on your evaluation of the photos, the inspection

21 report, the testimony, and your experience, have you come to a

22 conclusion as to what caused the damage to this machine?

23 A. Well, the cause was due to, I believe, the packaging of

24 the unit and the allowing of it to move with the inside not

25 being secured.

161

1 MR. COHEN: Your Honor, I'd like to introduce the

2 exhibits that I've referred to during the course of the

3 examination, including CT-3, CT-4, and CT-7. As well as a copy

4 of the page from the National Motor Freight Classification,

5 which we have marked, your Honor.

6 THE COURT: Well, just identify it for the record.

7 MR. COHEN: Yes, I'm sorry. This is page 200 of the
8 National Motor Freight Classification book.

9 THE COURT: How is it marked?

10 MR. COHEN: CT-16.

11 THE COURT: Those exhibits are all admitted.

12 MR. COHEN: I do have one final question, I
13 apologize, your Honor, with respect to this witness.

14 BY MR. COHEN:

15 Q. In the correspondence that you prepared denying the
16 claim, which is found at CT-7, let me put that up for the jury,
17 you indicate in there that "note, as you are aware per item 780
18 in CTII 100 rules tariff our liability is limited to \$10 per
19 container." Okay. Why did you write \$10 instead of 10 cents?

20 A. That would be \$10 per pound per container. I was unaware
21 that it was used. We after this at this point in time our
22 liability for new articles was \$10 a pound. And this claim was
23 filed for 120,000 plus. So the shipment weighed 5,200 pounds.
24 So the maximum liability would have been \$52,000. I was
25 unaware at the time that this was a used piece of equipment.

1 Q. Subsequently, they reduced this claim, correct?

2 A. Subsequently reduced their claims after the repairs were
3 made.

4 Q. The note on the bottom, it says another "note, per the
5 bill of lading, this shipment was moved at Class 50. We are
6 uncertain as to what NMFC item number this shipment may have
7 moved under. No support for this class was provided." Why did
8 you put in that notation?

9 A. Well, I thought there would be some further communication
10 in regards to this claim. And I wanted to record maybe I was
11 missing something, maybe this was a Class 50 item that I was
12 unaware of. So I was giving them the opportunity to provide
13 support for that Class 50 that they shipped the merchandise
14 under.

15 MR. COHEN: Thank you, Mr. Cackowski, I have no
16 further questions right now.

17 THE COURT: Members of the jury, we're going to
18 break at 4:15 today. I got a matter I have to attend to. Mr.
19 Cohen, how many more witnesses do you have besides this
20 gentleman?

21 MR. COHEN: Your Honor, the only witness that

22 Central Transport has left is the truck driver. As we
23 discussed earlier, he will be available tomorrow morning to
24 testify.

25 THE COURT: All right. Will he be relatively brief,

163

1 do you think?

2 MR. COHEN: Yes.

3 THE COURT: How many witnesses do you have, Mr.
4 Knox?

5 MR. KNOX: I believe we're going to have two.

6 THE COURT: Okay, go ahead.

7 CROSS-EXAMINATION

8 BY MR. KNOX:

9 Q. Good afternoon, Mr. Cackowski.

10 A. Good afternoon.

11 Q. Mr. Cackowski, are you familiar with Central Transport's
12 OS&D manual?

13 A. Yes.

14 Q. In fact, aren't you one of the contributors of the OS&D
15 manual?

16 A. Yes, I was.

17 Q. I'm showing you a page from the manual, do you recognize
18 that?

19 A. Yes, I do.

20 Q. Is that in fact a cover page for the OS&D manual?

21 A. Yes, it is.

22 Q. And that is your name on the front?

23 A. Yes, it is.

24 Q. I'm going to direct your attention to a page in the OS&D
25 manual titled pick up driver responsibilities, bill of lading

164

1 verification. Do you see that?

2 A. Yes, I do.

3 Q. In this section are you aware of any procedures for
4 checking the freight off the bill of lading that you mention
5 that the driver must verify the class of a certain item?

6 A. The driver won't be educated to verify the class of an
7 item.

8 Q. Interestingly, like in paragraph three, there's a
9 notation about bundles and skids, specific skids should be

10 called skids, bundles should be called bundles, drums, crates,

11 etc., plus as noted a comment. Do you see that?

12 A. Yes, I do.

13 Q. Were you here in the courtroom when Mr. Horetsky

14 testified?

15 A. Yes, I was.

16 Q. Did you hear him testify more or less that it's common

17 for Central Transport as the carrier to accept items

18 generically described as a skid or crate?

19 A. I am not sure exactly what Mr. Horetsky indicated.

20 Q. You don't remember that testimony?

21 A. I don't remember it like that, no.

22 Q. As you sit here today, knowing that provision,

23 specifically paragraph three in the IS&D manual, not

24 withstanding Mr. Horetsky may have said, you can't remember, do

25 you agree that Central Transport accepts goods generically

165

1 described as one crate, one pallet as such?

2 A. No, you're misinterpreting what is being said there. All

3 that is indicating is that the shipper has the responsibility

4 of properly indicating the type of packaging that's being
5 shipped. The crate should be called a crate. If it calls for,
6 the bill of lading says one crate, the driver to pick up one
7 crate. If it's a bundle and the bill of lading says a crate,
8 the driver should say no, that's wrong. You got to change the
9 bill of lading. That's all that is saying.

10 Q. I'm sorry. What if something does say one crate as it
11 does on the bill of lading here, is that a sufficient
12 description for the truck driver of Central Transport to
13 identify and pick up the crate?

14 A. For the truck driver, yes.

15 Q. Mr. Cackowski, very briefly, though, you testified a
16 little bit about your background in claims?

17 A. Uh-huh.

18 Q. Did you ever drive a truck?

19 A. No, I haven't.

20 Q. Have you ever operated a forklift?

21 A. No, I haven't.

22 Q. Mr. Cackowski, would you agree from the time the crate
23 was picked up in California until it was taken all the way to
24 Pennsylvania, that this crate was in a sole possession of

25 Central Transport?

166

1 A. It should have been, yes.

2 Q. It should have been?

3 A. Well, we have agents that work for us in different areas.

4 But they would be under the control of Central Transport.

5 Q. Are those agents forklift drivers?

6 A. Could be a forklift driver, could be truck drivers, could

7 be, but they would all be under the control of Central

8 Transport.

9 Q. Mr. Cackowski, a Class 50 or Class 100 designation, is

10 there any correlation as to how fragile an item might be?

11 A. If you're talking about the people who determine the

12 classification rating, yes.

13 Q. It does?

14 A. It would be one of the factors when establishing the

15 class for an item number. Item number, for example, when I

16 indicated class -- they would take into consideration when

17 they're putting that cost of class on, one of the variables

18 would be how fragile, how fragile is the unit. Whether it's in

19 a fragile case or not.

20 Q. Is merely one factor?

21 A. Merely one factor, there are numerous factors.

22 Q. I believe your testimony is this item should be classed

23 as a Class 100?

24 A. The freight classification and description of the

25 articles, yes.

167

1 Q. Are all Class 100 fragile?

2 A. You couldn't say all items that are classified as 100 are

3 fragile. You can make or non clarifications there.

4 Q. Exactly on Class 100 doesn't necessarily communicate a

5 fragile item, is that correct?

6 A. No. I don't know where you're going with that, it

7 doesn't correlate.

8 THE COURT: Hang on a second. Start all over again,

9 just ask the question, if you don't understand, just tell him

10 you don't understand it, request that he ask the question

11 again. This is the last run through on this class, I'm trying

12 to move this along, we've heard a lot about this. Go ahead.

13 BY MR. KNOX:

14 Q. If I'm a truck driver and I see an item that is marked as

15 Class 100, does that tell me that it's fragile?

16 A. No.

17 Q. Mr. Cackowski, isn't it true at the time you were

18 investigating this claim, that you didn't even know who

19 identified the class on the bill of lading?

20 A. I don't understand the question.

21 Q. At the time you were investigating this claim,

22 isn't it true, I believe you stated this in your deposition,

23 that at the time you were investigating this claim, you did not

24 even know who identified the class on the bill of lading?

25 A. Who identified the class, I don't know what you mean by

168

1 identified.

2 Q. Who listed it as Class 50?

3 A. I wouldn't personally know who did that, no. There was a

4 bill of lading issued by Logistics Plus. From reviewing the

5 information, now I would only assume that Logistics Plus did

6 that. But that would be an assumption.

7 Q. I saw on one of the documents, I've seen in your

8 testimony something to the effect that Class 50 is in fact the

9 cheapest rate on a shipment, is that correct?

10 A. That is correct. Given it cost less on class, I don't

11 think it would be allowed.

12 Q. Mr. Cackowski, I want to show you that letter again that

13 I believe is CT-7, again, that's the letter that you authored?

14 A. Yes.

15 Q. Isn't it true that the two bases for denying Accu-Spec's

16 claim in that letter are that you held a clear delivery, you

17 had no record of discrepancy in any shipment, those are the two

18 main bases, is that correct?

19 A. Correct.

20 Q. There is the mention of misclassification, if you will,

21 is merely just noted at the bottom, isn't that correct?

22 A. It's noted at the time, I didn't fully investigate that

23 at the time. As we go into it, of course, we know that is

24 correct. My initial thoughts were correct.

25 Q. And you testified I think lastly in response to questions

1 from Mr. Cohen the one line in here about \$10 per pound per

2 container, are you talking about limitation of liability, you

3 would agree that only applies, the limitation of liability if

4 in fact this tariff applies?

5 A. What tariff?

6 Q. Your tariff?

7 A. Our tariff does apply.

8 Q. I'm not saying it does or doesn't, I'm saying it only

9 applies, that limitation only applies if the tariff applies, if

10 it's in effect?

11 A. If it's a shipment we're handling, yes.

12 Q. Did you conduct the investigation into this entire claim,

13 initially you were the only person?

14 A. I reviewed the claim paperwork that came in.

15 Q. Did you make a determination whether the goods were new

16 or used?

17 A. Not at the time, I didn't have enough facts to base that

18 information on, nor did I need them. Because we did have a

19 clear delivery receipt. It was denied, the shipment was

20 delivered of contract, carriage expired and the shipment was

21 delivered without exception. Just the bill of lading was

22 signed, the delivery was signed clear.

23 Q. Last thing, Mr. Cackowski. After the damage to the
24 freight was discovered here in February of 2003, you did in
25 fact receive a claim against Central Transport exclusively from

170

1 Accu-Spec, is that correct?

2 A. That is correct.

3 Q. Isn't it true you also received about a month later,
4 specifically in May of 2003, a letter from Accu-Spec's counsel
5 demanding payment from Central Transport and Central Transport
6 only?

7 A. I don't recall the exact information within that letter.

8 MR. KNOX: Thank you very much, nothing further.

9 THE COURT: Mr. Delaney.

10 MR. DELANEY: Thank you, your Honor.

11 CROSS-EXAMINATION

12 BY MR. DELANEY:

13 Q. Mr. Cackowski, I'm Patrick Delaney, I represent
14 Accu-Spec. Am I correct that based on your letter, that is
15 CT-7, that you denied this claim on April 23, 2003?

16 A. I don't have the letter up there, if that's the date,

17 that's fine.

18 THE COURT: Is that a stipulated to date, the dates

19 on the letter?

20 MR. COHEN: The date of April 23rd?

21 THE WITNESS: Yes.

22 BY MR. DELANEY:

23 Q. Prior to that date had you contacted anyone at Accu-Spec?

24 A. No.

25 Q. Prior to that date had you contacted anyone from Dage?

171

1 A. No.

2 Q. Prior to that date had you contacted anyone from

3 Logistics Plus?

4 A. I don't believe so.

5 Q. Prior to that date had you talked to George Horetsky

6 about this claim?

7 A. I'm not certain -- no, I'm not certain on that one.

8 Q. Prior to that date had you interviewed the inspector that

9 Mr. Horetsky had arranged from MTI inspecting?

10 A. There would be no reason to, sir.

11 Q. Prior to this date did you speak with the driver who
12 picked up that package in California?

13 A. No reason to do so.

14 Q. Prior to that date did you pick up the phone and call the
15 driver that dropped the package off?

16 A. There would be no reason to, sir.

17 Q. Prior to that date did you physically examine the crate?

18 A. On the inspection report I did, sir.

19 Q. I don't mean that. Did you physically examine the crate?

20 A. Sir, there is no need to do that.

21 Q. My question is did you examine the crate?

22 A. Sir, there is no need to do so, no.

23 THE COURT: Excuse me, listen to his question and
24 answer it.

25 THE WITNESS: And I thought I did.

172

1 THE COURT: You just indicated that you thought that
2 there was, you were ships passing in the night. So just listen
3 very carefully and answer the question. Go ahead.

4 BY MR. DELANEY:

5 Q. Prior to the date April 23, 2003, did you physically
6 examine the equipment?

7 A. Not physically, no.

8 Q. Prior to the date had you made a determination of the
9 route by which this equipment had been moved from California to
10 Pennsylvania?

11 A. I would have looked at that, yes.

12 Q. And prior to April 23, 2003, did you attempt to contact
13 any other personnel of Central Transport that would have
14 handled the crate between California and Pennsylvania?

15 A. No, sir.

16 Q. You refer in your letter of April 23rd to completing your
17 investigation. Am I correct that you did none of those things
18 as part of your investigation, however?

19 A. My investigation, the information that was provided with
20 the delivery receipt and bill of lading and the inspection
21 report encompassed that information. There is no reason to do
22 each one of those individually.

23 Q. Did you see pictures prior to denying the claim on April
24 23, 2003, the pictures of the damage to the crate and
25 equipment?

1 A. Yes, I did.

2 Q. When did you review those?

3 A. I would have reviewed them when I reviewed the claim.

4 Q. And they came with the claim?

5 A. There would have been some pictures typically with an

6 inspection report and the inspection service, I don't know if

7 there the same pictures you have in your presentation or not.

8 Q. Do you dispute that Accu-Spec never received any shipping

9 documents from Central Transport or from Logistics Plus before

10 the equipment arrived on February 14, 2003?

11 A. I have no idea, we were not in communication with

12 Accu-Spec, they were not our customer in the case.

13 Q. My next question. There is no relationship between

14 Central Transport and Accu-Spec, is there?

15 A. No, there's not.

16 MR. DELANEY: That's all the questions I have of

17 this witness.

18 THE COURT: Anything further of this witness?

19 MR. COHEN: No, your Honor.

20 THE COURT: Thank you, sir, you're excused.

21 MR. COHEN: I don't want to keep anybody any
22 longer --

23 THE COURT: Then you're excused. Members of the
24 jury, that's it for today. All right, you folks be here at 9
25 o'clock tomorrow. We'll get through with the testimony. Then

174

1 we have something called a charge conference where I sit down
2 with the lawyers, we have to hash out exactly what I'm going to
3 tell you or not tell you in terms of my instructions. We'll do
4 that probably late tomorrow morning after the testimony. So
5 unless something unforeseen happens, you'll be deliberating the
6 case tomorrow morning. Remember what I told you, don't talk
7 about the case, don't let anybody talk about the case to you.
8 We're in recess until 9 o'clock tomorrow morning.

9

10 (Whereupon, at 4:10 p.m., the Jury Trial proceedings
11 were adjourned for the day.)
